Clear and maintain drainage canals, ditches, and waterways to prevent waterlogging and root rot. Excessive rain can leach nutrients from the soil. Apply slow-release or organic fertilizers to maintain soil fertility. Avoid applying fertilizers before heavy rains to prevent nutrient loss. Inspect and repair farmhouses, storage facilities, and greenhouses to prevent damage from prolonged wet conditions.

AREAS AFFECTED BY THE WEATHER SYSTEMS	HEAT INDEX MONITORING AND FORECASTING (OBSERVED AND 2-DAY FORECAST)
<b>LPA, EASTERLIES, AND THUNDERSTORMS AND MODERATE TO HEAVY RAINS</b> <ul style="list-style-type: none"><li>• Apply organic matter such as compost or mulch to improve soil fertility and moisture retention.</li><li>• Rotate crops to prevent soil depletion and reduce pest and disease buildup.</li><li>• Avoid excessive fertilizer application to prevent nutrient leaching and water contamination.</li><li>• Utilize rainwater harvesting techniques to supplement irrigation.</li><li>• Process surplus harvests (e.g., drying, fermenting, or preserving) to extend shelf life and reduce waste.</li></ul>	<p>The Heat Index is a human discomfort index that gives the apparent temperature on what humans perceive or feel as the temperature (from the surroundings) affecting the body. High air temperature and high relative humidity results to high apparent temperature</p> <p><a href="https://www.pagasa.dost.gov.ph/climate/climate-heat-index">https://www.pagasa.dost.gov.ph/climate/climate-heat-index</a></p>

FISHING ADVISORY
GALE WARNING AND SEA CONDITION
No Gale Warning is raised.
Slight to moderate seas will prevail over the <b>entire archipelago</b> . Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST-PAGASA.

Linisin at panatiliing maayos ang mga kanal at daluyan ng tubig upang maiwasan ang pagbaha at pagkabulok ng ugat ng pananim. Ang sobrang ulan ay maaaring magtangay ng mahahalagang sustansya mula sa lupa. Maglagay ng slow-release o organikong pataba upang mapanatili ang fertility ng lupa. Iwasan ang paglalagay ng pataba bago ang malalakas na pag-ulan upang maiwasan ang pagkawala ng sustansya. Suriin at kumpunihin ang mga bahay-sakahan, imbakán, at greenhouse upang maiwasan ang pinsala mula sa matagalang pag-ulan.
