| AREAS AFFECTED BY THE WEATHER SYSTEMS   | HEAT INDEX MONITORING AND FORECASTING (OBSERVED AND 2-DAY FORECAST)  |
|---|--|
| <b>EASTERLIES, THUNDERSTORMS AND MODERATE TO HEAVY RAINS</b> <ul style="list-style-type: none"><li>• Provide shade cloth or temporary shelters for delicate seedlings during the peak afternoon heat to protect them from excessive sun exposure.</li><li>• Use organic mulch, like straw or grass clippings, to help cool the root zones and maintain consistent moisture levels in the soil.</li><li>• Schedule fieldwork during early mornings or late afternoons to avoid the hottest part of the day and reduce heat stress on both workers and crops.</li><li>• Check storage areas for harvested crops (e.g., rice, corn, fruits, and vegetables). If necessary, move crops to elevated or covered areas to prevent water damage. Ensure farm equipment is stored in dry, sheltered locations to prevent rusting or malfunction.</li><li>• Heavy rains increase the risk of soil erosion. Take preventive measures like reinforcing embankments, creating terraces, or planting ground cover to stabilize the soil and prevent it from washing away.</li></ul> | <p>The Heat Index is a human discomfort index that gives the apparent temperature on what humans perceive or feel as the temperature (from the surroundings) affecting the body. High air temperature and high relative humidity results to high apparent temperature</p> <p><a href="https://www.pagasa.dost.gov.ph/climate/climate-heat-index">https://www.pagasa.dost.gov.ph/climate/climate-heat-index</a></p> |

| FARM ADVISORY   |  |

| SOIL MOISTURE CONDITION<br>(April 21 – 30, 2025)  | ENSO ALERT SYSTEM STATUS<br>(updated: 21 April 2025)   |
|  <p><b>Wet</b> – Albay, Sorsogon, Eastern Samar, Samar, Leyte, Zamboanga del Norte, Surigao del Norte and Surigao del Sur</p> <p><b>Moist</b> – Aparri, Aurora, Quezon, Camarines Norte, Catanduanes, Capiz, Northern Samar, rest of Zamboanga Peninsula, Bukidnon, and Davao del Norte</p> <p><b>Dry</b> – Rest of the country</p> | <p><b>MONTHLY CLIMATE ASSESSMENT AND OUTLOOK</b><br/><b>INACTIVE</b></p>  <p><a href="https://bagong.pagasa.dost.gov.ph/climate/el-nino-la-nina/monitoring">https://bagong.pagasa.dost.gov.ph/climate/el-nino-la-nina/monitoring</a></p> <p>Maintain proper drainage in lowland farms to prevent waterlogging. In rainfed areas, store excess water in farm reservoirs for use during drier months. Adopt integrated pest management (IPM) to prevent infestations, especially for rice, corn, and vegetables. Use covered storage areas to prevent moisture-related grain losses. Improve soil moisture retention through organic mulching and conservation farming techniques.</p> |

| FISHING ADVISORY  |
|---|
| GALE WARNING AND SEA CONDITION  |
| No Gale Warning is raised.  |
| Slight to moderate seas will prevail over <b>the whole archipelago</b> . Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST-PAGASA. |
