### MONTHLY CLIMATE ASSESSMENT AND OUTLOOK LA NIÑA ALERT

<https://bagong.pagasa.dost.gov.ph/climate/el-nino-la-nina/monitoring>

Enhance farm resilience by building drainage canals to prevent waterlogging and applying fungicides or biocontrol agents to manage fungal diseases. Prune fruit trees to reduce wind damage and store tools and machinery in covered areas to prevent deterioration. Regularly inspect crops for stress, pests, or diseases and apply necessary treatments. Repair damaged irrigation channels and dikes to prepare for future rainfall. To reduce post-harvest losses and increase income, process perishable products into value-added goods such as dried fruits, pickled vegetables, or flour.

### AREAS AFFECTED BY THE WEATHER SYSTEMS

#### EASTERLIES, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Inspect crops regularly for pests and diseases and address outbreaks immediately.
- Adjust irrigation frequency based on weather, soil type, and crop needs.
- Avoid over-irrigation to prevent root rot. Water plants early morning for better absorption.

### HEAT INDEX MONITORING AND FORECASTING (OBSERVED AND 2-DAY FORECAST)

The Heat Index is a human discomfort index that gives the apparent temperature on what humans perceive or feel as the temperature (from the surroundings) affecting the body. High air temperature and high relative humidity results to high apparent temperature

<https://www.pagasa.dost.gov.ph/climate/climate-heat-index>

- Inspect and clean drainage channels regularly to prevent blockages.
- Harvest crops on dry days to avoid spoilage, fungal infections, and loss of market value.
- Handle produce carefully during transport to prevent damage and contamination.

### FISHING ADVISORY

#### GALE WARNING AND SEA CONDITION

No Gale Warning is raised.

Moderate to rough seas are expected over **the eastern section of Luzon** while slight to moderate seas will prevail over the **rest of the archipelago**. Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST- PAGASA.

Palakasin ang katatagan ng sakahan sa pamamagitan ng paggawa ng mga kanal para maiwasan ang pagbara ng tubig at paglalagay ng fungicide o biocontrol agents upang mapigilan ang paglaganap ng fungal diseases. Putulan ang mga punong namumunga upang mabawasan ang pinsala mula sa malakas na hangin at itago nang maayos ang mga kagamitan at makinarya upang maiwasan ang pagkasira. Regular na suriin ang mga pananim para sa stress, peste, o sakit at agad na ipatupad ang angkop na lunas. Kumpunihin ang mga sirang kanal ng irigasyon at pilapil upang mapaghandaan ang mga susunod na pag-ulan. Upang mabawasan ang pagkalugi matapos ang anihan at mapataas ang kita, iproseso ang mga nabubulok na produkto bilang pinatuyong prutas, atsara, o harina.

**PAYO SA MGA MANGINGISDA**

**GALE WARNING AT KONDISYON NG KARAGATAN**

Walang nakataas na Gale Warning.

Katamtaman hanggang sa maalon na karagatan ang inaasahan **silangang bahagi ng Luzon**, samantalang banayad hanggang sa katamtamang pag-alon ng karagatan ang iiral sa **natitirang baybayin ng bansa**. Ang mga mangingisda ay pinapaalalahanan na palaging mag-ingat, ugaliing magdala ng mga gamit pangkagipitan, magbantay at makinig sa mga paalala at patalastas mula sa DOST-PAGASA.
