AREAS AFFECTED BY THE WEATHER SYSTEMS

SOUTHWEST MONSOON, LPA, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

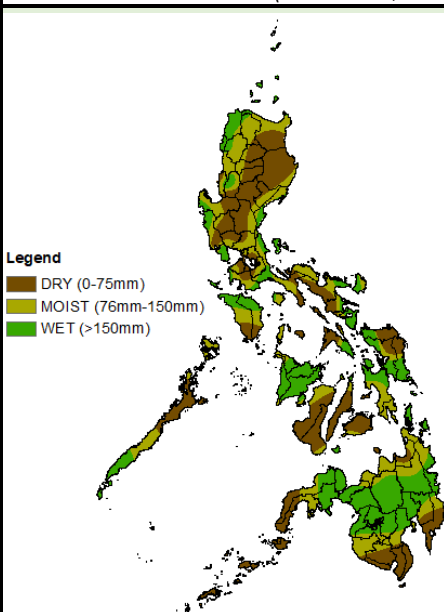

- Align planting schedules with updated weather forecasts to maximize water availability and avoid drought or flood periods.
- Clean canals, dikes, and drainage paths to prevent water from building up, which can damage plant roots and reduce harvest.
- Strengthen seedbeds and cover young plants with plastic or other protection to shield them from heavy rain.
- Store seeds, fertilizers, and harvested crops in dry, raised, and covered places to avoid spoilage.
- Apply fertilizer during dry weather to prevent it from being washed away; it's better to apply it in parts rather than all at once.
- Check and repair greenhouses, trellises, animal shelters, and storage areas for any damage caused by wind or rain.

Weed regularly to help crops grow better by reducing competition for nutrients, water, and sunlight. Apply the right amount and type of fertilizer as recommended, and avoid using too much chemical fertilizer to protect the soil and nearby water sources. Clear old plant parts and weeds that attract pests and diseases. Make and use compost or organic fertilizer to improve soil health and reduce the need for chemical products. Stay updated with local weather forecasts and advisories from DOST-PAGASA to guide smart and timely farming decisions.

FISHING ADVISORY

GALE WARNING AND SEA CONDITION

No Gale Warning is raised.

Slight to moderate seas will prevail over the **entire archipelago**. Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST-PAGASA.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

HABAGAT, LPA, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Itugma ang iskedyl ng pagtatanim sa mga pinakabagong ulat ng panahon upang mapakinabangan ang tubig at maiwasan ang tagtuyot o pagbaha.
- Linisin ang mga kanal, dike, at mga daanan ng tubig upang maiwasan ang pag-ipon ng tubig na maaaring makasira sa ugat ng halaman at magpababa ng ani.
- Palakasin ang mga seedbed at takpan ang mga batang tanim ng plastik o ibang proteksyon upang maprotektahan mula sa malakas na ulan.
- Itabi ang mga binhi, pataba, at aning pananim sa mga tuyong lugar na mataas at may takip upang maiwasan ang pagkasira.
- Maglagay ng pataba tuwing tuyong panahon upang maiwasan ang pagkalaba nito; mas mainam na ipamahagi ito ng paunti-unti kaysa sabay-sabay.
- Suriin at ayusin ang mga greenhouse, trellis, kulungan ng hayop, at mga imbakan para sa anumang pinsala dulot ng hangin o ulan.

Mag-alis ng damo nang regular upang makatulong sa mas maayos na paglaki ng mga pananim sa pamamagitan ng pagbawas ng kumpetisyon sa nutrients, tubig, at sikat ng araw. Gumamit ng tamang dami at uri ng pataba ayon sa rekomendasyon, at iwasan ang labis na paggamit ng kemikal na pataba upang maprotektahan ang lupa at mga pinagkukunan ng tubig. Alisin ang mga tuyong bahagi ng halaman at mga damong nakakaakit ng peste at sakit. Gumawa at gumamit ng compost o organikong pataba upang mapabuti ang kalusugan ng lupa at mabawasan ang paggamit ng kemikal. Manatiling updated sa mga lokal na ulat ng panahon at advisory mula sa DOST-PAGASA upang makagawa ng matalino at napapanahong desisyon sa pagsasaka.

PAYO SA MGA MANGINGISDA

GALE WARNING AT KONDISYON NG KARAGATAN

Walang nakataas na Gale Warning.

Banayad hanggang sa katamtamang pag-alon ng karagatan ang iiral sa **buong kapuluan**. Ang mga mangingisda ay pinapaalalahanan na palaging mag-ingat, ugaliing magdala ng mga gamit pangkagipitan, magbantay at makinig sa mga paalala at patalastas mula sa DOST-PAGASA.
