

## WEEKEND/SPECIAL FARM WEATHER OUTLOOK

WSFWO: NO. 26 – 024

Issued: 4:00 PM, Friday, 30 January 2026

Valid until: 7:00 AM, Monday, 02 February 2026

**Today (January 30):** Cloudy skies with scattered rains and isolated thunderstorms are expected over Caraga, Eastern Samar, Leyte, Southern Leyte, and Davao Oriental due to the shear line. Cloudy skies with light rains are also expected over Cagayan Valley, Apayao, Kalinga, Mountain Province, Ifugao, and Aurora. Meanwhile, partly cloudy to cloudy skies with isolated light rains will prevail over Metro Manila, the rest of Luzon, Western Visayas, Negros Island Region, and Central Visayas due to the Northeast Monsoon (Amihan). The rest of the country will be partly cloudy to cloudy with isolated rainshowers or thunderstorms.

**By Saturday to Monday (January 31–February 02):** More areas will be affected by the northward movement of the shear line. Scattered rains and isolated thunderstorms are likely over Visayas, the Bicol Region, Northern Mindanao, Caraga, and the provinces of Quezon, Oriental Mindoro, Marinduque, and Romblon. The Amihan may continue to bring cloudy skies with light rains over Cagayan Valley and Aurora, and partly cloudy to cloudy skies with isolated light rains over Metro Manila and the rest of Luzon. The rest of Mindanao will remain partly cloudy to cloudy with isolated rainshowers or thunderstorms.

FORECAST AREA	TEMPERATURE		RH (%)	LEAF WETNESS (HRS)
	LOWLAND	UPLAND		
LUZON	19 – 32	10 – 31	50 – 98	4 – 8
VISAYAS	23 – 33	20 – 31	55 – 98	4 – 8
MINDANAO	23 – 34	19 – 30	50 – 98	4 – 8

## FARM ADVISORY

### SOIL MOISTURE CONDITION (January 11 – 20, 2026)

**Wet** – Calayan, Aparri, Isabela, Aurora, Quezon, most of MIMAROPA, most of Bicol Region, most of Western Visayas, NIR, most of Eastern Visayas, Surigao del Norte, Bukidnon, Davao del Norte, rest of Northern Mindanao, Kabacan North Cotabato, and BARRM

**Moist** – Rest of Cagayan Valley, Subic, Cavite, Batangas, Rizal, Camarines Sur, most of Central Visayas,

Surigao del Sur, Misamis Oriental, Maguindanao, Davao del Sur, General Santos City, rest of Zamboanga Peninsula, and rest of Caraga

**Dry** – Ilocos Region, and the rest of the country

### ENSO ALERT SYSTEM STATUS (Updated as of 21 January 2026)

**LA NIÑA**

<https://pagasa.dost.gov.ph/climate/el-nino-la-nina/monitoring>

Farmers are advised to clean and repair irrigation canals, dikes, and drainage systems to prevent flooding. Planting should be adjusted according to soil moisture and rainfall conditions, and overly wet fields should be avoided. Proper plant spacing should be maintained to reduce pest and disease incidence. Fertilizer application should be reduced or postponed during heavy rains, and compost or organic fertilizers are recommended to improve soil structure. Regular monitoring for pests and diseases, especially fungal infections, is advised. Integrated Pest Management (IPM) practices should be implemented, and spraying should only be done under favorable weather. Harvesting should be scheduled on dry days, and proper drying and storage of produce must be ensured. Farm tools, machinery, and facilities should be kept clean and well-maintained. Follow PAGASA on social media or visit the website for the latest local weather updates and advisories.

#### **AREAS AFFECTED BY THE WEATHER SYSTEMS**

##### **NORTHEAST MONSOON, SHEAR LINE, THUNDERSTORMS AND MODERATE TO HEAVY RAINS**

- Prepare frost protection measures such as mulching, temporary covers, or windbreaks for frost-prone areas.
- Clean and maintain irrigation canals, drainage systems, and waterways to prevent flooding during heavy rains.
- Strengthen and secure nurseries, greenhouses, seedbeds, and trellises; relocate seedlings to safer or sheltered areas when needed.
- Harvest mature or market-ready crops ahead of heavy rains or adverse weather, when conditions permit.
- Conduct regular field monitoring and apply preventive pest and disease management measures once rains subside.
- Secure fertilizers, seeds, machinery, and tools in covered, dry, and elevated storage areas.
- Avoid fertilizer application and pesticide spraying during heavy rainfall or unstable weather conditions.
- Ensure the safety of farmers and farm workers by limiting or suspending field activities during severe weather events.

## TAYA NG PANAHOON AT MGA PAYONG PANSAKAHAN

FWFA: NO. 26 – 024

Inilabas ng: 4:00 PM, Biyernes, 30 Enero 2026

May bisa hanggang: 7:00 AM, Lunes, 02 Pebrero 2026

**Ngayong araw (Enero 30):** Inaasahan ang maulap na kalangitan na may kalat-kalat na pag-ulan at pulo-pulong pagkidlat at pagkulong sa Caraga, Eastern Samar, Leyte, Southern Leyte, at Davao Oriental dulot ng shear line. Makakaranas din ng maulap na kalangitan na may mahihinang pag-ulan ang Cagayan Valley, Apayao, Kalinga, Mountain Province, Ifugao, at Aurora. Samantala, bahagyang maulap hanggang maulap na kalangitan na may pulo-pulong mahihinang pag-ulan ang mararanasan sa Metro Manila, nalalabing bahagi ng Luzon, Kanlurang Visayas, Negros Island Region, at Gitnang Visayas dahil sa Northeast Monsoon o Amihan. Ang nalalabing bahagi ng bansa ay makakaranas ng bahagyang maulap hanggang maulap na kalangitan na may pulo-pulong pag-ulan o pagkidlat at pagkulong.

**Sa Sabado hanggang Lunes (Enero 31–Pebrero 02):** Mas marami pang lugar ang maaapektuhan ng pag-angat pahilaga ng shear line. Inaasahan ang kalat-kalat na pag-ulan at pulo-pulong pagkidlat at pagkulong sa Visayas, Rehiyon ng Bicol, Hilagang Mindanao, Caraga, at sa mga lalawigan ng Quezon, Oriental Mindoro, Marinduque, at Romblon. Samantala, patuloy na magdadala ang Amihan ng maulap na kalangitan na may mahihinang pag-ulan sa Cagayan Valley at Aurora, at bahagyang maulap hanggang maulap na kalangitan na may pulo-pulong mahihinang pag-ulan sa Metro Manila at nalalabing bahagi ng Luzon. Ang nalalabing bahagi ng Mindanao ay mananatiling bahagyang maulap hanggang maulap na kalangitan na may pulo-pulong pag-ulan o pagkidlat at pagkulong.

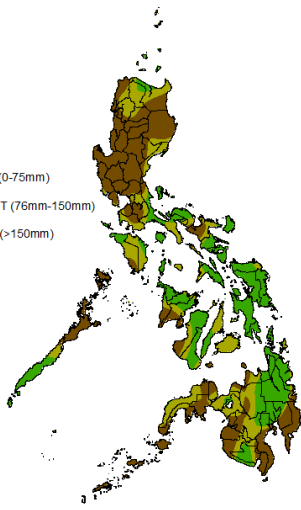

LUGAR NG PAGTAYA	TEMPERATURA (°C)		RH (%)	PAGKABASA NG DAHON (ORAS)
	Mababang Bukirin	Mataas na Bukirin		
LUZON	19 – 32	10 – 31	50 – 98	4 – 8
VISAYAS	23 – 33	20 – 31	55 – 98	4 – 8
MINDANAO	23 – 34	19 – 30	50 – 98	4 – 8

## PAYONG PANGSAKAHAN

### KALAGAYAN NG LUPANG SAKAHAN (Enero 11 – 20, 2026)

#### Legend

- DRY (0-75mm)
- MOIST (76mm-150mm)
- WET (>150mm)

Cotabato, at BARRM

**Katamtaman** – Natitirang bahagi ng Lambak ng Cagayan, Subic, Cavite, Batangas, Rizal, Camarines Sur, karamihan ng Central Visayas, Surigao del Sur, Misamis Oriental, Maguindanao, Davao del sur, General Santos City, natitirang bahagi ng Zamboanga Peninsula, at natitirang bahagi ng Caraga

**Tuyo** – Rehiyon ng Ilocos at natitirang bahagi ng bansa

**Basa** – Calayan, Aparri, Isabela, Aurora, Quezon, Karamhan ng MIMAROPA, Karamhan ng Rehiyon ng Bicol, Karamhan ng Western Visayas, NIR, Karamhan ng Eastern Visayas, Surigao del Norte, Bukidnon, NIR, Davao del Norte, natitirang bahagi ng Northern Mindanao, Kabacan North

### ENSO ALERT SYSTEM STATUS (mula noong 21 Enero 2026)

<https://pagasa.dost.gov.ph/climate/elnino-la-nina/monitoring>

Pinapayuhan ang mga magsasaka na linisin at kumpunihin ang mga kanal ng patubig, pilapil, at drainage systems upang maiwasan ang pagbaha. Ang pagtatanim ay dapat iayon sa kondisyon ng halumigmig ng lupa at dami ng ulan, at iwasan ang pagtatanim sa labis na basang lupa. Siguraduhin ang tamang agwat ng tanim upang mabawasan ang pagdami ng peste at sakit ng halaman. Ang paglalagay ng pataba ay dapat bawasan o ipagpaliban kung may malakas na ulan, at inirerekomenda ang paggamit ng compost o organikong pataba upang mapabuti ang istruktura ng lupa. Magsagawa ng regular na pagmamamanman para sa peste at sakit, lalo na sa fungal infections. Ipatupad ang Integrated Pest Management (IPM), at mag-spray lamang kung maganda ang layag ng panahon. I-iskedyul ang pag-aani sa mga araw na walang ulan, at tiyakin ang maayos na pagpapatuyo at imbakan ng ani. Panatilihin malinis at maayos ang mga kagamitan, makina, at pasilidad sa sakahan. Sundan ang opisyal na social media ng

PAGASA o bisitahin ang kanilang website para sa pinakabagong balita at abiso sa panahon sa inyong lugar.

#### **SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS**

##### **AMIHAN, SHEAR LINE, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN**

- Maghanda ng mga pananggalang laban sa frost tulad ng pagmamalts, pansamantalang takip, o windbreaks sa mga lugar na madaling tamaan ng frost.
- Linisin at panatilihin maayos ang mga kanal ng irigasyon, drainage system, at mga daluyan ng tubig upang maiwasan ang pagbaha tuwing may malakas na pag-ulan.
- Patibayin at siguruhing ligtas ang mga punlaan, greenhouse, seedbeds, at trellis; ilipat ang mga punla sa mas ligtas o masisilungan na lugar kung kinakailangan.
- Anihin nang mas maaga ang mga hinog o handa nang ibenta na pananim bago dumating ang malakas na ulan o masamang panahon, kung pinahihintulutan ng kalagayan.
- Magsagawa ng regular na pagmamanman sa bukid at magpatupad ng mga hakbang sa pag-iwas sa peste at sakit matapos humupa ang mga pag-ulan.
- Itago at siguruhing ligtas ang mga abono, binhi, makinarya, at kagamitan sa may bubong, tuyo, at mataas na imbakan.
- Iwasan ang paglalagay ng pataba at pag-spray ng pestisidyo kapag may malakas na pag-ulan o hindi matatag ang kondisyon ng panahon.
- Tiyakin ang kaligtasan ng mga magsasaka at manggagawang bukid sa pamamagitan ng paglilimita o pansamantalang paghinto ng mga gawain sa bukid tuwing may matinding lagay ng panahon.
