

WEEKEND/SPECIAL FARM WEATHER OUTLOOK

WSFWO: NO. 26 – 006

Issued: 4:00 PM, Friday, 09 January 2026

Valid until: 7:00 AM, Monday, 12 January 2026

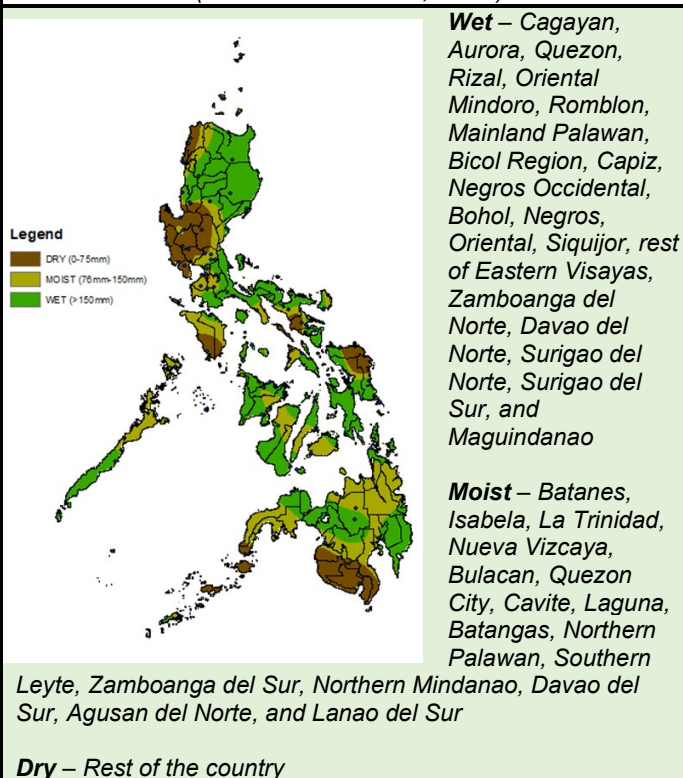

By Saturday (January 10): The axis of the shear line will shift northward, bringing cloudy skies with scattered rains and thunderstorms over Isabela, Aurora, and Quezon. Light rains are expected over the Cordillera Administrative Region (CAR) and the rest of Cagayan Valley due to the northeast monsoon. Cloudy skies with scattered rains and thunderstorms are likely over the Bicol Region, Eastern Visayas, Dinagat Islands, and Surigao del Norte due to easterlies. The Ilocos Region and the rest of Central Luzon will have partly cloudy to cloudy skies with light rains due to the northeast monsoon. The rest of the country will experience partly cloudy to cloudy skies with isolated rain showers or thunderstorms due to easterlies or localized thunderstorms.

By Sunday to Monday (January 11–12): Cloudy skies with scattered rains and thunderstorms are expected over Quezon and the Bicol Region due to the shear line, while cloudy skies with rains will prevail over Cagayan Valley, Apayao, Kalinga, Mountain Province, Ifugao, and Aurora due to the northeast monsoon. The Ilocos Region and the rest of Central Luzon will have partly cloudy to cloudy skies with light rains due to the northeast monsoon. The rest of the country will experience partly cloudy to cloudy skies with isolated rain showers or thunderstorms due to easterlies or localized thunderstorms. A possible low-pressure area (LPA) may also form southeast of Mindanao on Monday.

FARM ADVISORY

SOIL MOISTURE CONDITION (December 21 – 31, 2025)

ENSO ALERT SYSTEM STATUS (Updated as of 18 December 2025)

LA NIÑA

<https://pagasa.dost.gov.ph/climate/el-nino-la-nina/monitoring>

Farmers are advised to clean and repair irrigation canals, dikes, and drainage systems to prevent flooding. Planting should be adjusted according to soil moisture and rainfall conditions, and overly wet fields should be avoided. Proper plant spacing should be maintained to reduce pest and disease incidence. Fertilizer application should be reduced or postponed during heavy rains, and compost or organic fertilizers are recommended to improve soil structure. Regular monitoring for pests and diseases, especially fungal infections, is advised. Integrated Pest Management (IPM) practices should be implemented, and spraying should only be done under favorable weather. Harvesting should be scheduled on dry days, and proper drying and storage of produce must be ensured. Farm tools, machinery, and facilities should be kept clean and well-maintained. Follow PAGASA on social media or visit the website for the latest local weather updates and advisories.

AREAS AFFECTED BY THE WEATHER SYSTEMS

SHEAR LINE, NORTHEAST MONSOON, EASTERLIES, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Clean and repair irrigation canals, dikes, and drainage systems.
- Incorporate compost and organic matter to improve soil condition.
- Adjust planting schedules based on rainfall and soil moisture condition.
- Ensure proper plant spacing to reduce pest and disease incidence.
- Conduct regular irrigation, avoiding over-watering and waterlogging.
- Perform gap filling, thinning, and mulching as needed.
- Install stakes and trellises for vine crops.
- Apply basal and side-dress fertilizers following recommended rates.
- Time fertilizer application to avoid heavy rainfall events.
- Use foliar fertilizers during vegetative to early reproductive stages.

TAYA NG PANAHOON AT MGA PAYONG PANSAKAHAN

FWFA: NO. 26 – 006

Inilabas ng: 4:00 PM, Biyernes, 09 January 2026

May bisa hanggang: 7:00 AM, Lunes, 12 Enero 2026

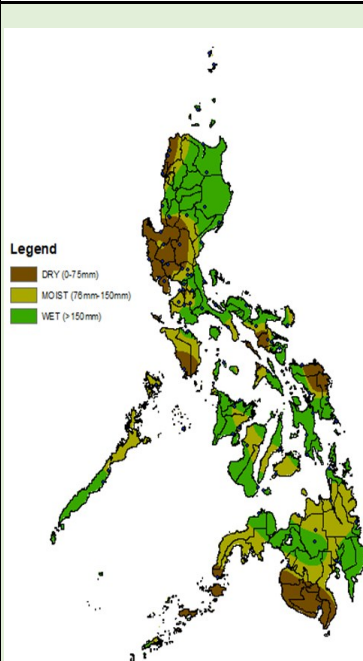

Sa Sabado (Enero 10): Lilipat pahilaga ang axis ng shear line na magdudulot ng maulap na kalangitan na may kalat-kalat na pag-ulan at pagkidlat-pagkulong sa Isabela, Aurora, at Quezon. Inaasahan ang mahihinang pag-ulan sa Cordillera Administrative Region (CAR) at sa natitirang bahagi ng Cagayan Valley dulot ng northeast monsoon. Mararanasan ang maulap na kalangitan na may kalat-kalat na pag-ulan at pagkidlat-pagkulong sa Bicol Region, Eastern Visayas, Dinagat Islands, at Surigao del Norte dahil sa easterlies. Ang Ilocos Region at ang natitirang bahagi ng Central Luzon ay makararanas ng bahagyang maulap hanggang maulap na kalangitan na may mahihinang pag-ulan dulot ng northeast monsoon. Ang iba pang bahagi ng bansa ay makararanas ng bahagyang maulap hanggang maulap na kalangitan na may panaka-nakang pag-ulan o pagkidlat-pagkulong dulot ng easterlies o mga lokalized na thunderstorm.

Sa Linggo hanggang Lunes (Enero 11–12): Inaasahan ang maulap na kalangitan na may kalat-kalat na pag-ulan at pagkidlat-pagkulong sa Quezon at Bicol Region dulot ng shear line, habang mararansan ang maulap na kalangitan na may pag-ulan sa Cagayan Valley, Apayao, Kalinga, Mountain Province, Ifugao, at Aurora dahil sa northeast monsoon. Ang Ilocos Region at ang natitirang bahagi ng Central Luzon ay makararanas ng bahagyang maulap hanggang maulap na kalangitan na may mahihinang pag-ulan dulot ng northeast monsoon. Ang iba pang bahagi ng bansa ay makararanas ng bahagyang maulap hanggang maulap na kalangitan na may panaka-nakang pag-ulan o pagkidlat-pagkulong dulot ng easterlies o mga lokal na thunderstorm. Posible ring mabuo ang isang low pressure area (LPA) sa timog-silangan ng Mindanao sa Lunes.

LUGAR NG PAGTAYA	TEMPERATURA (°C)		RH (%)	PAGKABASA NG DAHON (ORAS)
	Mababang Bukirin	Mataas na Bukirin		
LUZON	20 – 31	12 – 27	60 – 99	4 – 8
VISAYAS	23 – 31	21 – 30	50 – 98	2 – 8
MINDANAO	22 – 34	19 – 32	50 – 98	0 – 4

PAYONG PANGSAKAHAN

KALAGAYAN NG LUPANG SAKAHAN (Disyembre 21 – 31, 2025)

Legend
DRY (0-75mm)
MOIST (76mm-150mm)
WET (>150mm)

Northern Mindanao, Davao del Sur, Agusan del Norte, at Lanao del Sur

Basa – Cagayan, Aurora, Quezon, Rizal, Oriental Mindoro, Romblon, Kalupaan ng Palawan, Rehiyon ng Bicol, Capiz, Negros Occidental, Bohol, Negros, Oriental, Siquijor, natitirang bahagi ng Eastern Visayas, Zamboanga del Norte, Davao del Norte, Surigao del Norte, Surigao del Sur, at Maguindanao

Katamtaman – Batanes, Isabela, La Trinidad, Nueva Vizcaya, Bulacan, Quezon City, Cavite, Laguna, Batangas, Hilagang Palawan, Southern Leyte, Zamboanga del Sur,

ENSO ALERT SYSTEM STATUS (mula noong 18 Disyembre 2025)

LA NIÑA

<https://pagasa.dost.gov.ph/climate/elnino-la-nina/monitoring>

Pinapayuhan ang mga magsasaka na linisin at kumpunihin ang mga kanal ng patubig, pilapil, at drainage systems upang maiwasan ang pagbaha. Ang pagtatanim ay dapat iayon sa kondisyon ng halumigmig ng lupa at dami ng ulan, at iwasan ang pagtatanim sa labis na basang lupa. Siguraduhin ang tamang agwat ng tanim upang mabawasan ang pagdami ng peste at sakit ng halaman. Ang paglalagay ng pataba ay dapat bawasan o ipagpaliban kung may malakas na ulan, at inirerekomenda ang paggamit ng compost o organikong pataba upang mapabuti ang istruktura ng lupa. Magsagawa ng regular na pagmamanman para sa peste at sakit, lalo na sa fungal infections. Ipatupad ang Integrated Pest Management (IPM), at mag-spray lamang kung maganda ang lagay ng panahon. I-iskedyul ang pag-aani sa mga araw na walang ulan, at tiyakin ang maayos na pagpapatuyo at imbakan ng ani. Panatilihin malinis at maayos ang mga kagamitan, makina, at

Tuyo – *Natitirang bahagi ng bansa*

pasilidad sa sakahan. Sundan ang opisyal na social media ng PAGASA o bisitahin ang kanilang website para sa pinakabagong balita at abiso sa panahon sa inyong lugar.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

SHEAR LINE, AMIHAN, EASTERLIES, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Linisin at kumpunihin ang mga kanal ng patubig, pilapil, at daluyan ng tubig.
- Maglagay ng compost at organikong materyales upang mapabuti ang kondisyon at sustansiya ng lupa.
- Ilayon ang iskedyul ng pagtatanim batay sa dami ng ulan at kalagayan ng halumigmig ng lupa.
- Siguraduhin ang tamang agwat ng tanim upang mabawasan ang pagdami ng peste at sakit ng halaman.
- Isagawa ang regular na patubig, iwasan ang labis na pagdidilig at pagbabara o pagbabad ng tubig sa lupa.
- Gumawa ng gap filling, thinning, at mulching kung kinakailangan.
- Maglagay ng tukod at balag (trellis) para sa mga gumagapang o baging na pananim.
- Mag-apply ng basal at side-dress na pataba alinsunod sa inirerekomendang dami.
- Iwasan ang paglalagay ng pataba kung may inaasahang malakas na pag-ulan.
- Gumamit ng foliar fertilizer sa yugto ng vegetative hanggang maagang reproductive stage ng pananim.
