### AREAS AFFECTED BY THE WEATHER SYSTEMS

**TD VERBENA AND ITS TROUGH, NORTHEAST MONSOON, SHEARLINE, THUNDERSTORMS AND MODERATE TO HEAVY RAINS**

- Check irrigation systems before heavy rains to ensure they are not clogged or damaged, preventing overflows.
- Avoid applying fertilizers or pesticides right before heavy rains, as runoff can waste inputs and pollute water sources.

- Use elevated, well-ventilated storage facilities to protect harvested crops from pests, rodents, and flooding.
- Stack sacks and crates properly with enough space for air circulation; avoid direct contact with floors or walls by using wooden pallets.
- Store fertilizers, pesticides, and chemicals separately from harvested crops to prevent contamination.
- Use waterproof tarpaulins or covered vans when transporting produce to protect them from rain and excess moisture.

#### LA NIÑA ALERT

<https://bagong.pagasa.dost.gov.ph/climate/el-nino-la-nina/monitoring>

Conduct regular field monitoring since pests (e.g., stem borers, leaf folders) and diseases (e.g., blast, bacterial leaf blight) thrive in humid and wet conditions. Use biological and mechanical control methods before resorting to chemical sprays. Remove and properly dispose of infected plant debris to prevent the spread of diseases. Construct drainage furrows or contour canals in sloping areas to control runoff and reduce the risk of landslides. For vegetable production, use raised beds or ridges to improve drainage and promote healthy root growth. Dry grains and seeds properly under covered or mechanical dryers to prevent mold formation. Store harvested produce in elevated and well-ventilated areas to protect them from moisture and pest infestation. Before the onset of heavy rains, inspect storage facilities for any leaks or damage to ensure product safety and quality.

### FISHING ADVISORY

#### GALE WARNING AND SEA CONDITION

**Gale Warning is raised over the northern seaboard of Northern Luzon (Batanes).**

Rough seas will prevail over **Northern Luzon** and the eastern sections of **Central and Southern Luzon** while moderate to rough seas will be experienced over **the rest of Luzon and the rest of Visayas**. Meanwhile, **the rest of the archipelago** will have moderate seas. Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. **SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS**

**TD VERBENA AT ANG TROUGH NITO, AMIHAN, SHEARLINE, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN**

- Suriin ang mga sistema ng irigasyon bago ang malalakas na ulan upang matiyak na hindi ito barado o sira, at maiwasan ang sobrang pag-apaw.
- Iwasang maglagay ng pataba o pestisidyo bago ang malalakas na ulan, dahil maaaring tangayin lamang ito at

makapagdulong ng polusyon sa mga daluyan ng tubig.

- Gumamit ng mataas at maaliwalas na imbakan upang maprotektahan ang mga ani laban sa peste, daga, at pagbaha.
- Ayusin nang maayos ang pagkakapatong ng mga sako at kahon at maglaan ng espasyo para sa sirkulasyon ng hangin; gumamit ng papag upang hindi direktang nakalapat sa sahig o dingding.
- Itabi nang hiwalay ang mga pataba, pestisidyo, at kemikal mula sa mga inaning produkto upang maiwasan ang kontaminasyon.
- Gumamit ng waterproof na tolda o saradong van sa pagdadala ng ani upang maprotektahan ito laban sa ulan at sobrang halumigmig.

#### ENSO ALERT SYSTEM STATUS

(mula noong 05 Nobyembre 2025)

#### LA NIÑA ALERT

<https://bagong.pagasa.dost.gov.ph/climate/elnino-la-nina/monitoring>

Magsagawa ng regular na pagmamanman sa bukid dahil ang mga peste (halimbawa: stem borers, leaf folders) at mga sakit ng halaman (halimbawa: blast, bacterial leaf blight) ay madaling kumalat sa mahalumigmig at basang kondisyon. Gumamit muna ng mga biological at mechanical na pamamaraan ng pagpuksa bago gumamit ng mga kemikal na pestisidyo. Alisin at maayos na itapon ang mga nahawaang bahagi ng halaman upang maiwasan ang pagkalat ng sakit. Magpatayo ng mga kanal o contour canal sa mga bahaging mabundok o may dalisdis upang makontrol ang daloy ng tubig at maiwasan ang pagguho ng lupa. Para sa mga gulay, gumamit ng raised bed o pilapil upang mapabuti ang daloy ng tubig at mas mapangalagaan ang ugat ng mga tanim. Patuyuin nang maayos ang mga butil at binhi sa ilalim ng bubong o gamit ang mechanical dryer upang maiwasan ang pagkakaroon ng amag. Itago ang mga ani sa mataas at maaliwalas na lugar upang hindi mabasa at mapinsala ng mga peste. Bago dumating ang malalakas na pag-ulan, suriin ang mga imbakan kung may tagas o sira upang mapanatili ang kaligtasan at kalidad ng produkto.

### PAYO SA MGA MANGINGISDA

#### GALE WARNING AT KONDISYON NG KARAGATAN

**Nakataas ang Gale Warning sa hilagang baybaying-dagat ng Hilagang Luzon (Batanes).**

Magiging maalon ang karagatan sa **Hilagang Luzon at sa silangang bahagi ng Gitna at Katimugang Luzon** habang katamtaman hanggang maalon ang magiging kondisyon ng dagat sa **natitirang bahagi ng Luzon at natitirang bahaagi ng Kabisayaan**. Sa natitirang bahagi naman ng kapuluan ay inaasahan ang katamtaman na pag-alon ng karagatan. Ang mga mangingisda ay pinapaalalahanan na palaging mag-ingat, ugaliing magdala ng mga gamit pangkagipitan, magbantay at makinig sa mga paalala at patalastas mula sa DOST-PAGASA.
