LA NIÑA

<https://pagasa.dost.gov.ph/climate/elnino-la-nina/monitoring>

Promote the use of raised beds, contour farming, and proper field levelling to prevent waterlogging and support better drainage during prolonged rainfall events. Strengthen bunds and levees around rice fields and low-lying farms to reduce the risk of overflow from nearby rivers and canals. Install windbreaks using bamboo, live trees, or netting to protect sensitive crops from strong winds. Harvest mature and near-mature crops ahead of forecasted heavy rains to minimize losses and ensure better post-harvest quality. Use portable dryers, plastic-covered drying floors, or elevated racks to protect harvested grains, root crops, and coconut from moisture exposure. Conduct regular inspections of storage facilities, ensuring all produce, seeds, and feeds are kept dry, elevated, and well-ventilated to prevent mold and spoilage. Implement schedule-based pest and disease scouting, particularly for fungal infections that commonly occur after continuous rains, and apply appropriate control measures immediately. Coordinate closely with the Municipal/City Agriculture Office for updates and emergency support related to agricultural impacts in your area. Regularly follow the official PAGASA accounts on social media or visit their website for the latest weather updates and advisories specific to your area.

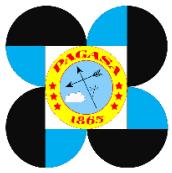

AREAS AFFECTED BY THE WEATHER SYSTEMS

NORTHEAST MONSOON, EASTERLIES, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Monitor daily weather forecasts and advisories from DOST-PAGASA.
- Adjust planting, spraying, and harvesting schedules based on expected rainfall.
- Ensure proper field drainage to prevent waterlogging and root rot.
- Store harvested crops and farm inputs in elevated, dry, and covered areas.
- Apply mulch to reduce soil erosion and maintain soil moisture balance.
- Conduct regular field inspections for lodging, stem rot, and nutrient deficiencies.
- Remove and destroy infected plant parts to limit disease spread.
- Apply pest and disease control measures during dry windows.
- Clean and service farm tools, sprayers, and machinery after use.
- Check irrigation canals, dikes, and water gates for blockages or damage.

AMIHAN, EASTERLIES, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN
<ul style="list-style-type: none"> Subaybayan araw-araw ang mga ulat at babala sa panahon mula sa PAGASA. Ilayon ang iskedyul ng pagtatanim, pag-iispra, at pag-aani batay sa inaanahang dami ng ulan. Siguraduhing maayos ang daluyan ng tubig sa bukid upang maiwasan ang pagbabara ng tubig at pagkabulok ng ugat. Itago ang mga nauning pananim at farm inputs sa mataas, tuyo, at may bubong na lugar. Maglagay ng mulch upang mabawasan ang pagguho ng lupa at mapanatili ang tamang halumigmig ng lupa. Magsagawa ng regular na pag-iinspeksyon sa bukid para sa pagkadapa ng pananim, pagkabulok ng tangkay, at kakulangan sa sustansya. Tanggalin at sirain ang mga apektadong bahagi ng halaman upang maiwasan ang pagkalat ng sakit. Isagawa ang pest at disease control sa mga panahong tuyo o walang ulan. Linisin at i-maintain ang mga kagamitanng pansakahan, sprayer, at makinarya pagkatapos gamitin. Suriin ang mga kanal ng irrigasyon, dike, at water gates kung may bara o pinsala.
