ENSO ALERT SYSTEM STATUS

(updated: 26 August 2025)

https://bagong.pagasa.dost.gov.ph/climate/elnino-lanina/monitoring

Farmers should clean and strengthen canals, dikes, and furrows to prevent flooding. Plant early-maturing and flood-tolerant crops to lessen losses during heavy rains. Apply fertilizer only when the weather is clear to avoid wastage. Practice crop rotation and intercropping to keep the soil healthy. Stake or tie tall crops like corn, beans, ampalaya, and tomato to stop them from falling. Watch out for pests and diseases that spread in wet fields, and harvest mature crops early before strong rains.

AREAS AFFECTED BY THE WEATHER SYSTEMS

EASTERLIES, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Check irrigation systems before heavy rains to ensure they are not clogged or damaged, preventing overflows.
- · Avoid applying fertilizers or pesticides right before heavy rains, as runoff can waste inputs and pollute water sources.
- Use organic matter or compost to enrich soil and improve water retention.
- · Harvest during dry weather whenever possible to maintain product quality and avoid excess moisture.
- · Handle produce carefully to reduce bruising, cuts, or damage that can shorten shelf life.
- Dry grains (e.g., rice, corn) immediately after harvest using solar dryers or mechanical dryers to prevent mold and aflatoxin buildup.
- Use elevated, well-ventilated storage facilities to protect harvested crops from pests, rodents, and flooding.
- Stack sacks and crates properly with enough space for air circulation; avoid direct contact with floors or walls by using wooden pallets.
- Store fertilizers, pesticides, and chemicals separately from harvested crops to prevent contamination.
- Use waterproof tarpaulins or covered vans when transporting produce to protect them from rain and excess moisture.

FISHING ADVISORY

GALE WARNING AND SEA CONDITION

No Gale Warning is raised.

Slight to moderate seas will prevail over the **whole archipelago**. Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST- PAGASA.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

EASTERLIES, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Suriin ang mga sistema ng irigasyon bago ang malalakas na ulan upang matiyak na hindi ito barado o sira, at maiwasan ang sobrang pag-apaw.
- Iwasang maglagay ng pataba o pestisidyo bago ang malalakas na ulan, dahil maaaring tangayin lamang ito at makapagdulot ng polusyon sa mga daluyan ng tubig.
- Gumamit ng organikong pataba o kompost upang mapayaman ang lupa at mapanatili ang tamang halumigmig.
- Mag-ani sa tuyo o maaraw na panahon hangga't maaari upang mapanatili ang kalidad ng produkto at maiwasan ang sobrang halumigmig.
- Hawakan nang maingat ang mga ani upang maiwasan ang pagkadurog, pagkagasgas, o pagkasira na nakababawas sa tagal ng imbakan.
- Patuyuin agad ang mga butil (hal. palay, mais) pagkatapos anihin gamit ang solar dryer o mechanical dryer upang maiwasan ang amag at aflatoxin.
- Gumamit ng mataas at maaliwalas na imbakan upang maprotektahan ang mga ani laban sa peste, daga, at pagbaha.
- Ayusin nang maayos ang pagkakapatong ng mga sako at kahon at maglaan ng espasyo para sa sirkulasyon ng hangin; gumamit ng papag upang hindi direktang nakalapat sa sahig o dingding.
- Itabi nang hiwalay ang mga pataba, pestisidyo, at kemikal mula sa mga inaning produkto upang maiwasan ang kontaminasyon.
- Gumamit ng waterproof na tolda o saradong van sa pagdadala ng ani upang maprotektahan ito laban sa ulan at sobrang halumigmig.

Dapat linisin at patibayin ng mga magsasaka ang mga kanal, pilapil, at tudling upang maiwasan ang pagbaha. Mainam ding magtanim ng mga pananim na maagang mahinog at matibay sa baha upang mabawasan ang pagkalugi sa malalakas na ulan. Mag-abono lamang kapag maliwanag ang panahon upang hindi masayang, at isagawa ang crop rotation at intercropping upang mapanatiling mataba at malusog ang lupa. Talian o suportahan ang matatangkad na pananim gaya ng mais, sitaw, ampalaya, at kamatis upang hindi mabuwal. Bukod dito, magbantay laban sa mga peste at sakit na mabilis kumalat sa basang bukirin, at anihin agad ang mga hinog na pananim bago pa man dumating ang malalakas na pag-ulan.
