AREAS AFFECTED BY THE WEATHER SYSTEMS	HEAT INDEX MONITORING AND FORECASTING (OBSERVED AND 2-DAY FORECAST)
 EASTERLIES, THUNDERSTORMS AND MODERATE TO HEAVY RAINS Inspect crops regularly for pests and diseases and address outbreaks immediately. Adjust irrigation frequency based on weather, soil type, and crop needs. Avoid over-irrigation to prevent root rot. Water plants early morning for better absorption. Inspect and clean drainage channels regularly to prevent blockages. Harvest crops on dry days to avoid spoilage, fungal infections, and loss of market value. Handle produce carefully during transport to prevent damage and contamination. 	The Heat Index is a human discomfort index that gives the apparent temperature on what humans perceive or feel as the temperature (from the surroundings) affecting the body. High air temperature and high relative humidity results to high apparent temperature https://www.pagasa.dost.gov.ph/climate/climate-heat-index

FISHING ADVISORY

GALE WARNING AND SEA CONDITION

No Gale Warning is raised.

Slight to moderate seas will prevail over **the whole archipelago**. Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST-PAGASA.
