FARM WEATHER FORECAST AND ADVISORIES

FWFA: NO. 25 – 195

Issued: 7:00 AM, Thursday, 21 August 2025 Valid until: 7:00 AM, Friday, 22 August 2025

SYNOPSIS: At 3:00 AM today, the Low Pressure Area (LPA) was estimated based on all available data at 705 km East of Infanta, Quezon (14.6°N, 128.2°E). Southwest Monsoon affecting Palawan and the western section of Mindanao.

	TEMPERATURE (°C)					
FORECAST AREA	AGRI-WEATHER	R WINDS	LOWLAND	UPLAND	RH%	LEAF WETNESS (HRS)
Metro Manila, Bicol Region, CALABARZON, Cagayan, Isabela, Aurora, Oriental Mindoro, Marinduque, Romblon, Northern Samar, Eastern Samar, Samar, and Biliran	Cloudy skies with scattered rains and thunderstorms	Metro Manila, Bicol Region, CALABARZON, Oriental Mindoro, Marinduque, Romblon, Northern Samar, Eastern Samar, Samar, and Biliran — Light to moderate from northwest to west; Cagayan, Isabela, and Aurora — Light to moderate from east to northeast	22 – 33	20 – 30	70 - 99	6 – 10
The rest of Visayas, Zamboanga Peninsula, Basilan, Tawi-Tawi, Occidental Mindoro, and Palawan	Cloudy skies with scattered rains and thunderstorms	The western section of Visayas, Zamboanga Peninsula, Basilan, Tawi-Tawi, Occidental Mindoro, and Palawan – Light to moderate from south to southwest; The rest of Visayas – Light to moderate from northwest to west	22 – 34	22 – 30	70 - 99	4 – 8
The rest of the country	Partly cloudy to cloudy skies with isolated rainshowers or thunderstorms	The rest of Mindanao – Light to moderate from south to southwest; The rest of Northern and Central Luzon – Light to moderate from east to northeast; The rest of the country – Light to moderate from northwest to west	22 – 33	14 – 30	45 – 96	0-4

AREAS AFFECTED BY THE WEATHER SYSTEMS

TROUGH OF LPA, SOUTHWEST MONSOON, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Check irrigation systems before heavy rains to ensure they are not clogged or damaged, preventing overflows.
- Avoid applying fertilizers or pesticides right before heavy rains, as runoff can waste inputs and pollute water sources.
- Use organic matter or compost to enrich soil and improve water retention.
- · Harvest during dry weather whenever possible to maintain product quality and avoid excess moisture.
- Handle produce carefully to reduce bruising, cuts, or damage that can shorten shelf life.
- Dry grains (e.g., rice, corn) immediately after harvest using solar dryers or mechanical dryers to prevent mold and aflatoxin buildup.
- Use elevated, well-ventilated storage facilities to protect harvested crops from pests, rodents, and flooding.
- Stack sacks and crates properly with enough space for air circulation; avoid direct contact with floors or walls by using wooden pallets.

FARM ADVISORY

- Store fertilizers, pesticides, and chemicals separately from harvested crops to prevent contamination.
- Use waterproof tarpaulins or covered vans when transporting produce to protect them from rain and excess moisture.

Legend Legend DRY (0-75mm) DRY (0-75mm) WET (>150mm) WET (>150mm) WET (>00 common logent) West (

SOIL MOISTURE CONDITION (August 1-10, 2025)

Wet – Most of Ilocos Region, most of Cagayan Valley, Cordillera Administrative Region, most of Central Luzon, National Capital Region, most of CALABARZON, Aborlan, Albay, Catanduanes, Capiz, Leyte, Zamboanga del Norte, Bukidnon, and Davao Region

Moist – Batac, Isabela, Aurora, Laguna, Batangas, most of MIMAROPA, most of Bicol Region, most of Western Visayas, Negros Oriental, Siquijor, Samar, Northern Samar, Misamis Oriental, Surigao del Sur, and BARMM

Dry – Rest of the country

ENSO ALERT SYSTEM STATUS (updated: 07 August 2025)

MONTHLY CLIMATE ASSESSMENT AND OUTLOOK

https://bagong.pagasa.dost.gov.ph/climate/elnino-lanina/monitoring

Farmers should regularly check local weather forecasts, since rain may vary from one area to another. Keep field drainage clear and prepare for sudden heavy rains or thunderstorms. Save water and prepare for short dry periods by collecting rainwater and applying mulch to keep the soil moist. Check and secure storage areas for seeds, fertilizers, pesticides, and animal feeds. Keep them off the ground and covered to avoid spoilage from moisture. Monitor crops closely, control pests, and maintain healthy soil. Stay updated with weather forecasts and local advisories through radio, mobile alerts, or social media. Assign farm workers clear tasks and safety reminders, especially when working during or after rains.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

TROUGH NG LPA, HABAGAT, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

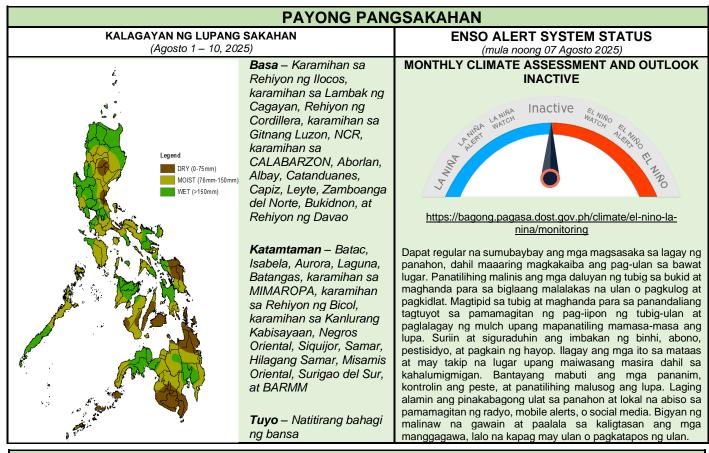

- Suriin ang mga sistema ng irigasyon bago ang malalakas na ulan upang matiyak na hindi ito barado o sira, at maiwasan ang sobrang pag-apaw.
- Iwasang maglagay ng pataba o pestisidyo bago ang malalakas na ulan, dahil maaaring tangayin lamang ito at makapagdulot ng polusyon sa mga daluyan ng tubig.
- Gumamit ng organikong pataba o kompost upang mapayaman ang lupa at mapanatili ang tamang halumigmig.
- Mag-ani sa tuyo o maaraw na panahon hangga't maaari upang mapanatili ang kalidad ng produkto at maiwasan ang sobrang halumigmig.
- Hawakan nang maingat ang mga ani upang maiwasan ang pagkadurog, pagkagasgas, o pagkasira na nakababawas sa tagal ng imbakan.
- Patuyuin agad ang mga butil (hal. palay, mais) pagkatapos anihin gamit ang solar dryer o mechanical dryer upang maiwasan ang amag at aflatoxin.
- Gumamit ng mataas at maaliwalas na imbakan upang maprotektahan ang mga ani laban sa peste, daga, at pagbaha.
- Ayusin nang maayos ang pagkakapatong ng mga sako at kahon at maglaan ng espasyo para sa sirkulasyon ng hangin; gumamit ng papag upang hindi direktang nakalapat sa sahig o dingding.
- Itabi nang hiwalay ang mga pataba, pestisidyo, at kemikal mula sa mga inaning produkto upang maiwasan ang kontaminasyon.
- Gumamit ng waterproof na tolda o saradong van sa pagdadala ng ani upang maprotektahan ito laban sa ulan at sobrang halumigmig.
