EL NIÑO

https://www.pagasa.dost.gov.ph/climate/climate-advisories

Moderate to strong El Niño is present in the Tropical Pacific. Climate models predict that El Niño will continue until the first half of 2027 and may reach a very strong state before the end of 2026.

Farmers are advised to conserve water, maintain irrigation systems, and harvest rainwater to ensure adequate water supply during El Niño. Use drought-tolerant crops and soil moisture conservation practices. Regularly monitor DOST-PAGASA weather updates and adjust farm activities accordingly. Despite generally drier conditions, localized thunderstorms may still bring heavy rain, strong winds, lightning, and possible flash flooding.

AREAS AFFECTED BY THE WEATHER SYSTEMS
TROUGH OF TC, ITCZ, EASTERLIES, THUNDERSTORMS AND MODERATE TO HEAVY RAINS • Clean and maintain drainage canals to prevent waterlogging and flooding. • Delay fertilizer application when heavy rainfall is forecast to minimize nutrient loss. • Avoid pesticide spraying during rainy or windy conditions to ensure effectiveness. • Regularly inspect and maintain irrigation and drainage systems. • Remove debris from canals and waterways to improve water flow. • Harvest and store excess rainwater for future use during dry periods. • Harvest mature crops before prolonged or heavy rainfall, when feasible. • Continue monitoring weather forecasts, rainfall advisories, and other relevant information from DOST-PAGASA and local authorities for timely decision-making.

EL NIÑO

https://www.pagasa.dost.gov.ph/climate/climate-advisories

Kasalukuyang umiiral ang katamtamang hanggang sa malakas na El Niño sa Tropical Pacific. Ayon sa mga forecast, inaasahang magpapatuloy ang El Niño hanggang sa unang kalahati ng 2027 at may posibilidad na maging mas malakas bago matapos ang 2026.

Pinapayuhan ang mga magsasaka na magtipid sa tubig, panatilihing maayos ang irigasyon, at mag-ipon ng tubig-ulan upang matiyak ang suplay ng tubig sa panahon ng El Niño. Gumamit ng mga pananim na matibay sa tagtuyot at mga pamamaraan sa pagpapanatili ng halumigmig ng lupa. Regular na subaybayan ang mga update ng DOST-PAGASA at iangkop ang mga gawaing pansaka ayon sa kondisyon ng panahon. Bagama't mas tuyo ang karaniwang kondisyon, maaari pa ring magkaroon ng localized thunderstorms na may malakas na ulan, hangin, pagkidlat, at posibleng biglaang pagbaha.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

TROUGH NG TC, ITCZ, EASTERLIES, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Linisin at panatilihing maayos ang mga kanal upang maiwasan ang pagbaha at pamamalagi ng tubig sa bukirin.
- Ipagpaliban ang paglalagay ng pataba kung inaasahan ang malakas na pag-ulan upang mabawasan ang pagkawala ng sustansya sa lupa.
- Iwasan ang pag-iisprey ng pestisidyo kapag umuulan o malakas ang hangin upang matiyak ang bisa nito.
- Regular na suriin at panatilihing maayos ang mga sistema ng irigasyon at paagusan ng tubig.
- Alisin ang mga bara at dumi sa mga kanal at daluyan ng tubig upang mapabuti ang daloy ng tubig.
- Mag-ipon at mag-imbak ng tubig-ulan para magamit sa panahon ng tagtuyot.
- Anihin ang mga hinog na pananim bago ang inaasahang matagal o malakas na pag-ulan, kung maaari.
- Laging makinig sa mga payo ng awtoridad at lokal na pamahalaan para sa mga ulat panahon.Maging updated sa DOST-PAGASA website, social media, at PANaHON App.
