ENSO ALERT SYSTEM STATUS (Updated as of 26 May 2026)

EL NIÑO ALERT

<https://pagasa.dost.gov.ph/climate/climate-advisories#>

El Niño is expected to develop by mid-2026, increasing the possibility of below-normal rainfall, dry spells, and drought. Farmers are advised to maintain irrigation systems, use drought-tolerant crops, and harvest mature crops early when needed. Localized thunderstorms may still occur, especially in the afternoon or evening, bringing heavy rain, strong winds, lightning, and possible flash flooding in low-lying areas. Farmers should stay alert to daily weather updates, secure farm structures, and avoid field activities during thunderstorms, and adjust planting schedules based on DOST-PAGASA forecasts.

AREAS AFFECTED BY THE WEATHER SYSTEMS

TC ESTER, SOUTHWEST MONSOON, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Prepare for possible flooding and waterlogging in low-lying farm areas by ensuring proper drainage and clearing canals.
- Protect crops from excessive rain and strong winds by reinforcing plants (staking) and using temporary protective covers when possible.
- Monitor crops closely for diseases, especially fungal infections, due to high humidity and continuous rainfall.
- Avoid applying fertilizers and agricultural chemicals when heavy rains are expected to prevent nutrient loss through runoff.
- Plan early harvesting for crops that are already mature to minimize potential damage and post-harvest losses.
- Ensure the safety of livestock, farm equipment, and harvested produce from rain and flood exposure.
- Prepare emergency supplies and follow LGU advisories in case weather conditions worsen.
- Stay updated with the latest weather bulletins from DOST-PAGASA for timely guidance and warnings.

EL NIÑO ALERT

<https://pagasa.dost.gov.ph/climate/climate-advisories#>

Inaasahang ang El Niño sa kalagitnaan ng 2026, na magdudulot ng tagtuyot at posibleng kakulangan sa tubig. Pinapayuhan ang mga magsasaka na panatilihin ang maayos na irigasyon, gumamit ng drought-tolerant na pananim, at anihin agad ang mga hinog na tanim kung kinakailangan. Maaari pa ring magkaroon ng localized thunderstorms, lalo na sa hapon o gabi, na may kasamang malakas na ulan, hangin, kidlat, at posibleng flash flood sa mabababang lugar. Panatiling updated sa araw-araw na lagay ng panahon, tiyakin ang kaligtasan ng mga pasilidad sa bukid, iwasan ang trabaho sa bukid tuwing may thunderstorm, at iangkop ang taniman ayon sa forecast ng DOST-PAGASA.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

TC ESTER, HABAGAT, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Maghanda laban sa posibleng pagbaha at waterlogging sa mga mabababang lugar ng sakahan sa pamamagitan ng maayos na drainage at paglilinis ng kanal.
- Protektahan ang mga pananim laban sa labis na ulan at hangin sa pamamagitan ng pagsuporta sa mga halaman (staking) at paggamit ng pansamantalang panangga kung maaari.
- Bantayan ang mga sakit sa pananim, lalo na ang fungal infections, dahil sa mataas na halumigmig at patuloy na pag-ulan.
- Iwasan ang paglalagay ng pataba at kemikal kung inaasahan ang tuloy-tuloy na malakas na ulan upang hindi ito ma-wash out.
- Magplano ng maagang pag-aani sa mga pananim na handa na upang mabawasan ang pinsala sa ani.
- Siguraduhing ligtas ang mga alagang hayop, kagamitan, at naani na produkto mula sa ulan at pagbaha.
- Maghanda ng emergency supplies at sundin ang mga abiso ng LGU sakaling lumala ang kondisyon ng panahon.
- Manatiling alerto sa mga update mula sa DOST-PAGASA para sa pinakabagong lagay ng panahon at babala.
