

**FARM WEATHER FORECAST AND ADVISORIES**  
**FWFA: NO. 26 – 184**

**Issued: 7:00 AM, Tuesday, 11 August 2026      Valid until: 7:00 AM, Wednesday, 12 August 2026**

**SYNOPSIS: Southwest Monsoon affecting Luzon.**

**TROPICAL CYCLONE OUTSIDE PAR AS OF 3:00 AM TODAY**

**TROPICAL STORM PEILOU (2616)**

LOCATION: 3,355 KM EAST OF EXTREME NORTHERN LUZON (22.7°N, 154.3°E)

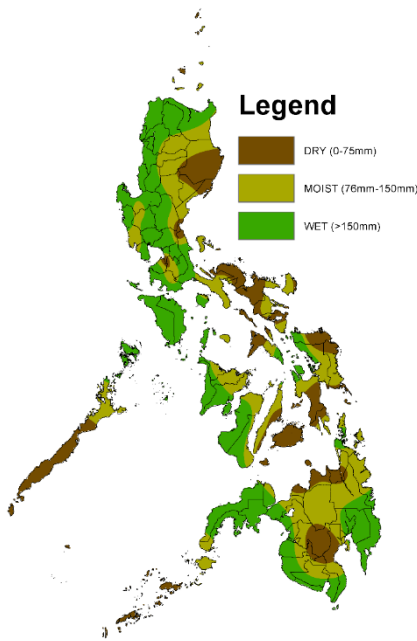

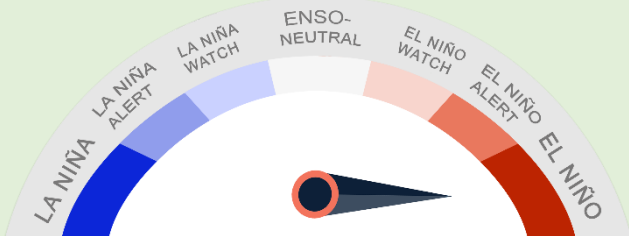

MAXIMUM SUSTAINED WINDS: 85 KM/H NEAR THE CENTER

GUSTINESS: UP TO 105 KM/H

MOVEMENT: EAST NORTHEASTWARD AT 25 KM/H

| FORECAST AREA                                                                                                                                            | AGRI-WEATHER                                                             | WINDS                                                                                                                                                                                                                                                                                    | TEMPERATURE (0C) |         | RH%     | LEAF WETNESS (HRS) |

Climate models indicate that it is likely to intensify and persist through the first half of 2027 (97% probability). There is a 57% probability of El Niño strengthening to a strong event during the July–August–September (JAS) 2026 season, while a very strong El Niño is favored during the October–November–December (OND) 2026 and November–December–January (NDJ) 2026–2027 seasons, with an estimated 81% probability.</p> <p>Farmers are advised to conserve water, maintain irrigation systems, and establish rainwater harvesting facilities to maximize available water during dry periods. The use of drought-tolerant crops and soil moisture conservation practices is encouraged to reduce the impacts of El Niño. Farmers should monitor daily DOST-PAGASA weather updates, as localized thunderstorms may still bring heavy rainfall, strong winds, lightning, and possible flash flooding. Secure farm structures, clear drainage canals, and adjust farm activities based on weather conditions to minimize risks.</p> |

| AREAS AFFECTED BY THE WEATHER SYSTEMS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

### FISHING ADVISORY

#### GALE WARNING AND SEA CONDITION

Gale warning was raised over **the seaboard of Extreme Northern Luzon** (Batanes and Babuyan Islands {Babuyan Is., Calayan Is.})

Moderate to rough seas are expected over the **northern and western seaboard of Luzon**, while slight to moderate seas will be experienced over the **rest of the archipelago**. Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST- PAGASA.

**PAYO SA MGA MANGINGISDA**

**GALE WARNING AT KONDISYON NG KARAGATAN**

Nakataas ang Gale warning sa **baybayin ng dulong Hilagang Luzon** (Batanes and Babuyan Islands {Babuyan Is., Calayan Is.})

Katamtaman hanggang sa maalon na karagatan ang inaasahan sa **hilaga at kanlurang mga baybayin ng Luzon**, samantalang banayad hanggang sa katamtamang pag-alon ng karagatan ang mararanasan sa **natitirang bahagi ng kapuluan**. Ang mga mangingisda ay pinapaalalahanan na palaging mag-ingat, ugaliing magdala ng mga gamit pangkagipitan, magbantay at makinig sa mga paalala at patalastas mula sa DOST-PAGASA.

**DAGDAG KAALAMAN**

**DAILY EXTREMES**

**MONTHLY EXTREMES**

Pinakamataas na Temperatura 37.9 °C (Tuguegarao City, 1959)

Pinakamataas na Temperatura 39.4 °C (Tuguegarao, 1960)

Pinakamababang Temperatura 13.5 °C (Baguio City, 1908)

Pinakamababang Temperatura 12.8 °C (Baguio City, 1923)

Pinakamaraming Ulan 411.3 mm (Itbayat, 1983)

Pinakamaraming Ulan 969.8 mm (Baguio City, 2008)
