

FARM WEATHER FORECAST AND ADVISORIES
FWFA: NO. 26 – 119

Issued: 7:00 AM, Thursday, 28 May 2026

Valid until: 7:00 AM, Friday, 29 May 2026

SYNOPSIS: Southwesterly Windflow affecting Palawan and the western sections of Visayas and Mindanao. Trough of Tropical Storm (TS) affecting the eastern section of Mindanao.

TROPICAL CYCLONE OUTSIDE PAR AS OF 3:00 AM TODAY

TROPICAL STORM JANGMI (2606)

LOCATION: 1,195 KM EAST OF EASTERN VISAYAS (11.3°N, 136.7°E)

MAXIMUM SUSTAINED WINDS: 65 KM/H NEAR THE CENTER

GUSTINESS: UP TO 80 KM/H

MOVEMENT: NORTH NORTHWESTWARD AT 20 KM/H

FORECAST AREA	AGRI-WEATHER	WINDS	TEMPERATURE (0C)		RH%	LEAF WETNESS (HRS)
			LOWLAND	UPLAND		
Western Visayas, Negros Island Region, Zamboanga Peninsula, SOCCSKSARGEN, BARMM, Lanao del Norte, Misamis Occidental, and Palawan	Cloudy skies with scattered rains and thunderstorms	Light to moderate from southwest to west	24 – 34	19 – 31	60 – 98	2 – 6
The rest of Mindanao	Cloudy skies with scattered rains and thunderstorms	Eastern section of Mindanao – Light to moderate from west to northwest; Rest of Mindanao – Light to moderate from southwest to west;	25 – 33	22 – 31	65 – 99	4 – 6
Metro Manila and the rest of the country	Partly cloudy to cloudy skies with isolated rainshowers or thunderstorms	Eastern section of Visayas – Light to moderate from west to northwest; Extreme Northern Luzon – Light to moderate from northwest to west; The rest of Visayas – Light to moderate from southwest to west; Rest of the country – Light to moderate with variable direction;	24 – 41	18 – 38	45 – 96	0 – 4

AREAS AFFECTED BY THE WEATHER SYSTEMS

TROUGH OF TS, SOUTHWESTERLY WINDFLOW, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

HEAT INDEX MONITORING AND FORECASTING (OBSERVED AND 2-DAY FORECAST)

The Heat Index is a human discomfort index that gives the apparent temperature on what humans perceive or feel as the temperature

- Mulch around plants to retain soil moisture, suppress weeds, and regulate temperature.
- Use soil moisture monitoring to avoid unnecessary irrigation.
- Inspect irrigation systems regularly to ensure even water distribution and prevent waterlogging.
- Ensure farm equipment is stored in dry, sheltered locations to prevent rusting or malfunction.
- Heavy rains increase the risk of soil erosion. Take preventive measures like reinforcing embankments, creating terraces, or planting ground cover to stabilize the soil and prevent it from washing away.
- Document weather impacts on crops to improve future planning and climate-resilient practices.
- Keep updated with local advisories from LGUs and DOST-PAGASA for early warnings.

(from the surroundings) affecting the body. High air temperature and high relative humidity results to high apparent temperature.

FISHING ADVISORY	
GALE WARNING AND SEA CONDITION	
No Gale Warning was raised.	
Slight to moderate seas will prevail over the entire archipelago . Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST- PAGASA.	

ADDITIONAL INFORMATION			
DAILY EXTREMES		MONTHLY EXTREMES	
Maximum Temperature	40.5 °C (Tuguegarao City, 1916)	Maximum Temperature	42.2 °C (Tuguegarao, 1969)

TAYA NG PANAHAON AT MGA PAYONG PANSAKAHAN
FWFA: NO. 26 – 119

Inilabas ng: 7:00 AM, Huwebes, 28 Mayo 2026 May bisa hanggang: 7:00 AM, Biyernes, 29 Mayo 2026

SYNOPSIS: Southwesterly Windflow ang nakakaapekto sa kanlurang bahagi ng Kabisayaan at Mindanao. Trough ng Tropical Storm (TS) ang nakakaapekto sa silangang bahagi ng Mindanao.

TROPICAL CYCLONE SA LABAS NG PAR KANINANG 3:00 AM

TROPICAL STORM JANGMI (2606)

LOKASYON: 1,195 KM SILANGAN NG SILANGANG KABISAYAAN (11.3°N, 136.7°E)

MALAKAS NA HANGIN: 65 KM/H MALAPIT SA GITNA

PAGBUGSO NG HANGIN: AABOT SA 80 KM/H

PAGKILOS: PATUNGONG KANLURAN HILAGANG KANLURAN SA BILIS NA 20KM/H

LUGAR NG PAGTAYA	LAGAY NG PANAHAON PANG-AGRIKULTURA	HANGIN	TEMPERATURA (°C)		RH%	PAGKABAS A NG DAHON (ORAS)
			Mababang Bukirin	Mataas na Bukirin		
Kanlurang Kabisayaan, Negros Island Region, Zamboanga Peninsula, SOCCSKSARGEN, BARMM, Lanao del Norte, Misamis Occidental, at Palawan	Maulap na kalangitan na may kalat-kalat na pag-ulan at pagkidlat-pagkulong	Mahina hanggang sa katamtaman mula timog-kanluran hanggang kanluran	24 – 34	19 – 31	60 – 98	2 – 6
Natitirang bahagi ng Mindanao	Maulap na kalangitan na may kalat-kalat na pag-ulan at pagkidlat-pagkulong	Silangang bahagi ng Mindanao – Mahina hanggang sa katamtaman mula kanluran hanggang hilagang kanluran; Natitirang bahagi ng Mindanao – Mahina hanggang sa katamtaman mula timog-kanluran hanggang kanluran	25 – 33	22 – 31	65 – 99	4 – 6
Metro Manila at natitirang bahagi ng bansa	Bahagyang maulap hanggang sa maulap na kalangitan na may pulu-pulong pag-ulan o pagkidlat-pagkulong	Silangang Kabisayaan – Mahina hanggang sa katamtaman mula kanluran hanggang hilagang kanluran; Dulong Hilagang Luzon – Mahina hanggang sa katamtaman mula hilagang kanluran hanggang kanluran;	24 – 41	18 – 38	45 – 96	0 – 4

		Natitirang bahagi ng Kabisayaan - Mahina hanggang sa katamtaman mula timog-kanluran hanggang kanluran Natitirang bahagi ng bansa – Mahina hanggang sa katamtaman na may pabagu-bagong direksyon

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS	PAGSUBAYBAY AT PAGTATAYA NG HEAT INDEX (NAOBSERBAHAN AT 2-ARAW NA PAGTATAYA)
SOUTHWESTERLY WINDFLOW, TROUGH NG TS, PAGKIDLAT-PAGKULOG AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN • Maglagay ng dayami o mulch sa paligid ng mga halaman upang mapanatili ang halumigmig ng lupa, mapigilan ang damo, at magregulate ang temperatura. • Gumamit ng soil moisture monitoring upang maiwasan ang hindi kailangang patubig. • Regular na inspeksyunin ang sistema ng irigasyon upang matiyak ang pantay na distribusyon ng tubig at maiwasan ang sobrang pagbaha. • Panatilihin ang malinis ang mga kagamitang pangsakahan upang maiwasan ang pagkalat ng sakit sa pagitan ng mga pananim. • Ang malalakas na ulan ay maaaring magdulot ng pagguho ng lupa. Gumawa ng mga hakbang tulad ng pagpapalakas ng mga dike, paggawa ng mga terrace, o pagtatanim ng mga halamang makakatulong upang maiwasan ang pagkawala ng lupa at mapigilan ang erosion. • Idokumento ang epekto ng panahon sa mga pananim upang mapabuti ang pagpapalano at mga climate-resilient na gawain sa hinaharap. • Makinig at sumunod sa mga lokal na abiso mula sa LGUs at DOST-PAGASA para sa maagang babala.	Ang init na nararamdaman ng katawan ng tao (apparent temperature) ay hindi akma ng nasusukat gamit lamang ang temperature ng hangin (air temperature). Ito ay mas tamang naitataya kung isasama ang datos ng alinsangan o halumigmig (relative humidity). Ang impormasyon na ito ay tinatawag na Heat Index at ito ay matutukoy gamit ang Heat Index Chart. https://www.pagasa.dost.gov.ph/climate/climate-heat-index

PAYONG PANGSAKAHAN	
KALAGAYAN NG LUPANG SAKAHAN (Mayo 11 – 20, 2026)	ENSO ALERT SYSTEM STATUS (mula noong 26 Mayo 2026)

PAYO SA MGA MANGINGISDA

GALE WARNING AT KONDISYON NG KARAGATAN

Walang nakataas na Gale Warning.

Banayad hanggang sa katamtamang pag-alon ng karagatan ang mararanasan sa **buong kapuluan**. Ang mga mangingisda ay pinapaalalahanan na palaging mag-ingat, ugaliing magdala ng mga gamit pangkagipitan, magbantay at makinig sa mga paalala at patalastas mula sa DOST-PAGASA.
