EL NIÑO

<https://www.pagasa.dost.gov.ph/climate/el-nino-la-nina/monitoring>

El Niño is expected to develop by mid-2026, increasing the possibility of below-normal rainfall, dry spells, and drought. Farmers are advised to maintain irrigation systems, use drought-tolerant crops, and harvest mature crops early when needed. Localized thunderstorms may still occur, especially in the afternoon or evening, bringing heavy rain, strong winds, lightning, and possible flash flooding in low-lying areas. Farmers should stay alert to daily weather updates, secure farm structures, and avoid field activities during thunderstorms, and adjust planting schedules based on DOST-PAGASA forecasts.

AREAS AFFECTED BY THE WEATHER SYSTEMS

SOUTHWEST MONSOON, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Inspect crops regularly for signs of flooding, waterlogging, pest infestations, and disease outbreaks, and implement appropriate control measures as soon as conditions permit.
- Secure greenhouses, nurseries, seedbeds, storage facilities, and other farm structures by reinforcing roofs, coverings, and loose materials against strong winds.
- Avoid field operations during thunderstorms to protect farmers and workers from lightning, strong winds, and other weather-related hazards.
- Check irrigation systems, pumps, and drainage facilities after heavy rains, and repair any damaged or blocked sections to restore efficient water management.
- Prepare contingency plans for harvesting, post-harvest handling, transportation, and marketing to minimize production and economic losses during prolonged adverse weather conditions.
- Remove fallen branches, lodged plants, and other debris from fields to improve drainage, reduce disease risks, and facilitate recovery after adverse weather.
- Maintain communication with local agricultural offices and disaster risk reduction authorities for updates, technical assistance, and emergency response support.
- Continue monitoring weather forecasts, rainfall advisories, and tropical cyclone bulletins issued by DOST-PAGASA and local authorities to guide timely agricultural decision-making and risk reduction.

FISHING ADVISORY

GALE WARNING AND SEA CONDITION

No Gale warning was raised

Moderate to rough seas will prevail over **Luzon** while slight to moderate seas are expected over **Visayas and Mindanao**. Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit.
