AREAS AFFECTED BY THE WEATHER SYSTEMS

TROUGH OF TC DOMENG, SOUTHWESTERLY WINDFLOW, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Apply proper irrigation, mulching, shading, and moisture monitoring to reduce heat and water stress.
- Stay hydrated, avoid peak heat, and take breaks in shaded areas.
- Clear and maintain canals, dikes, and drainage lines to quickly remove excess water and reduce flooding risk during heavy rains.
- Increase field scouting, as high humidity and intermittent rains can trigger outbreaks (e.g., fungal diseases, insect pests).
- Harvest early-maturing crops ahead of forecasted heavy rains to minimize post-harvest losses.
- Utilize plastic mulch, row covers, or simple rain shelters to protect sensitive crops from excessive rainfall.
- Collect rainwater during wet periods for use during dry days.
- Coordinate with farmer groups and LGUs for shared resources, early warnings, and disaster response.
- Stay updated with advisories from LGUs and DOST-PAGASA to guide daily farm decisions.

TROUGH OF TC DOMENG, SOUTHWESTERLY WINDFLOW,, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Magpatupad ng tamang patubig, pagmu-mulch, paglalagay ng lilim, at pagmamanman ng halumigmig ng lupa upang mabawasan ang stress sa init.
- Uminom ng sapat na tubig, iwasan ang matinding init, at magpahinga sa lilim.
- Linisin at panatilihin ang mga kanal, dike, at daluyan ng tubig upang maiwasan ang pagbaha.
- Palakasin ang pagmamanman sa bukid dahil maaaring dumami ang peste at sakit sa mataas na halumigmig at pabugsu-bugsong ulan.
- Mag-ani nang maaga bago ang inaasahang malalakas na ulan upang maiwasan ang pagkalugi.
- Gumamit ng plastic mulch, row covers, o simpleng rain shelter para maprotektahan ang mga sensitibong pananim.
- Mag-ipon ng tubig-ulan para magamit sa mga tuyong araw.
- Makipag-ugnayan sa mga samahan ng magsasaka at LGUs para sa tulong at babala.
