 Legend - DRY (0-75mm) - MOIST (76mm-150mm) - WET (>150mm)		 EL NIÑO https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf Moderate to strong El Niño is present in the Tropical Pacific. Climate models predict that El Niño will continue until the first half of 2027 and may reach a very strong state before the end of 2026. Farmers are advised to conserve water, maintain irrigation systems, and harvest rainwater to ensure adequate water supply during El Niño. Use drought-tolerant crops and soil moisture conservation practices. Regularly monitor DOST-PAGASA weather updates and adjust farm activities accordingly. Despite generally drier conditions, localized thunderstorms may still bring heavy rain, strong winds, lightning, and possible flash flooding.

- layon ang iskedyul ng pagtatanim, pag-iispray, at pag-aani batay sa inaasahang pag-ulan.
- Siguraduhing maayos ang daluyan ng tubig sa bukid upang maiwasan ang pagbabara ng tubig at pagkabulok ng ugat.
- Maglagay ng mulch upang mabawasan ang pagguho ng lupa at mapanatili ang tamang halumigmig ng lupa.
- Regular na inspeksyunin ang bukid upang matukoy ang pagkakadapa ng mga pananim, pagkabulok ng tangkay, at kakulangan sa sustansya.
- Alisin ang mga bahaging may sakit upang maiwasan ang pagkalat nito sa ibang mga halaman.
- Iwasan ang pag-iispray ng pataba at pestisidyo kapag inaasahan ang pag-ulan.
- Lagyan ng tukod o suporta ang mga pananim na madaling matumba, lalo na ang matatangkad at mabibigat na pananim.
- Takpan at protektahan ang mga naaning pananim laban sa ulan habang isinasagawa ang pagkakarga, pagbibiyahe, at pagbababa ng mga ito.
- Laging makinig sa mga payo ng mga awtoridad at lokal na pamahalaan tungkol sa mga kondisyon ng panahon. Manatiling updated sa mga ulat at abiso mula sa DOST-PAGASA website, social media accounts, at PANaHON App.
