BAGONG PILIPINAS

WEEKEND/SPECIAL FARM WEATHER OUTLOOK

WSFWO: NO. 26 – 261

Issued: 4:00 PM, Friday, 13 November 2026 **Valid until: 7:00 AM, Thursday, 19 November 2026**

Tomorrow to Sunday (November 14–15): The *Easterlies* will cause cloudy skies with scattered rains and thunderstorms over Caraga and Davao Region. Batanes and Babuyan Islands will generally have mostly cloudy skies with isolated light rains due to the *Northeast Monsoon*. Meanwhile, Metro Manila and the rest of the country will experience partly cloudy to cloudy skies with isolated rainshowers or thunderstorms.

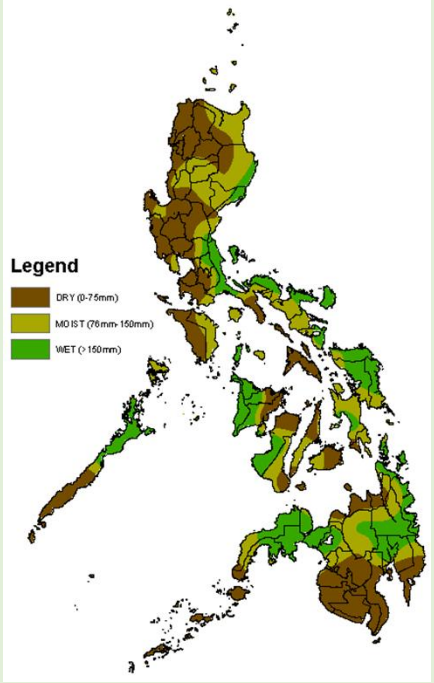

Monday to Wednesday (November 16–18): Batanes and Babuyan Islands will have partly cloudy to cloudy skies with isolated light rains due to the *Northeast Monsoon*. Meanwhile, Metro Manila and the rest of the archipelago will experience partly cloudy to cloudy skies with chances of isolated rainshowers or thunderstorms, mostly over the eastern sections, due to the *Easterlies*.

Thursday (November 19): The strengthening *Northeast Monsoon* will bring cloudy skies with light rains over Cagayan Valley, while partly cloudy to cloudy skies with isolated light rains will prevail over Ilocos Region, CAR, and Central Luzon. Meanwhile, Mindanao will have mostly cloudy skies with scattered rains and thunderstorms due to the *Intertropical Convergence Zone (ITCZ)*. Metro Manila and the rest of the country will experience partly cloudy to cloudy skies with chances of isolated rainshowers or thunderstorms, mostly over the eastern sections of Southern Luzon and Visayas, due to the *Easterlies*.

FORECAST AREA	TEMPERATURE		RH (%)	LEAF WETNESS (HRS)
	LOWLAND	UPLAND		
LUZON	23 – 34	14 – 32	45 – 98	4 – 8
VISAYAS	23 – 35	22 – 33	50 – 96	0 – 4
MINDANAO	23 – 35	21 – 33	50 – 98	4 – 8

FARM ADVISORY

SOIL MOISTURE CONDITION
(November 01 – 10, 2026)

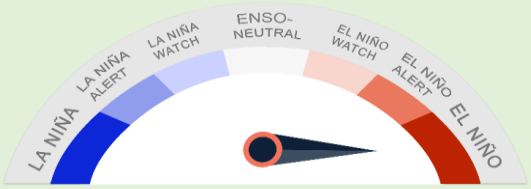

Wet – *Casiguran, Itbayat, most parts of Quezon, Camarines Norte, Catanduanes, Sorsogon, Leyte, Zamboanga del Norte, Bukidnon, Surigao del Norte, Surigao del Sur, and Lanao del Sur*

Moist – *most parts of Cagayan Valley, La Trinidad, Science Garden, Bataan, Rizal, Oriental Mindoro, Northern Palawan, Camarines Sur, Albay, Iloilo, Bohol, Northern Samar, Samar, Eastern Samar, Davao del Norte, Davao del Sur, North Cotabato, and rest of BARMM*

Dry – *Tuguegarao, Mulanay, rest of the country*

ENSO ALERT SYSTEM STATUS
(Updated as of 04 November 2026)

EL NIÑO

https://pubfiles.pagasa.dost.gov.ph/pagasaweb/files/climate/monthlyclimateassessment/EN_Advisory_5.pdf

Very Strong El Niño is currently present in the tropical Pacific and is expected to persist until the first half of 2027, potentially reaching its peak by the end of 2026.

El Niño increases the likelihood of rainfall deficits, which may result in dry spells and drought in several areas of the country. However, episodes of heavy rainfall conditions may still occur due to the passage of tropical cyclones and other rain-bearing weather systems. However, above-normal rainfall conditions may still occur during the passage of tropical cyclones and other rain-bearing weather systems. Farmers are advised to conserve water, maintain irrigation systems, and harvest rainwater to ensure adequate water supply during El Niño. Use drought-tolerant crops and soil moisture conservation practices. Regularly monitor DOST-PAGASA weather updates and adjust farm activities accordingly. Despite generally drier conditions, localized thunderstorms may still bring heavy rain, strong winds, lightning, and possible flash flooding.

(PAGASA)

AREAS AFFECTED BY THE WEATHER SYSTEMS
NORTHEAST MONSOON, EASTERLIES, ITCZ, THUNDERSTORMS AND MODERATE TO HEAVY RAINS • Clean and maintain drainage canals to prevent waterlogging and flooding. • Delay fertilizer application when heavy rainfall is forecast to minimize nutrient loss. • Avoid pesticide spraying during rainy or windy conditions to ensure effectiveness. • Regularly inspect and maintain irrigation and drainage systems. • Remove debris from canals and waterways to improve water flow. • Harvest and store excess rainwater for future use during dry periods. • Harvest mature crops before prolonged or heavy rainfall, when feasible. • Continue monitoring weather forecasts, rainfall advisories, and other relevant information from DOST-PAGASA and local authorities for timely decision-making.

BAGONG PILIPINAS

TAYA NG PANAHON AT MGA PAYONG PANSAKAHAN

FWFA: NO. 26 – 261

Inilabas ng: 4:00 PM, Biyernes, 13 Nobyembre 2026 **May bisa hanggang: 7:00 AM, Huwebes, 19 Nobyembre 2026**

Bukas hanggang Linggo (Nobyembre 14–15): Magdudulot ang *Easterlies* ng maulap na kalangitan na may mga kalat-kalat na pag-ulan at pulu-pulong pagkidlat at pagkulog sa Caraga at Rehiyon ng Davao. Inaasahan naman sa Batanes at Babuyan Islands ang madalas na maulap na kalangitan na may pulu-pulong mahinang pag-ulan dulot ng *Amihan*. Samantala, ang Metro Manila at natitirang bahagi ng bansa ay makararanas ng bahagyang maulap hanggang maulap na kalangitan na may pulu-pulong pag-ulan o pagkidlat at pagkulog.

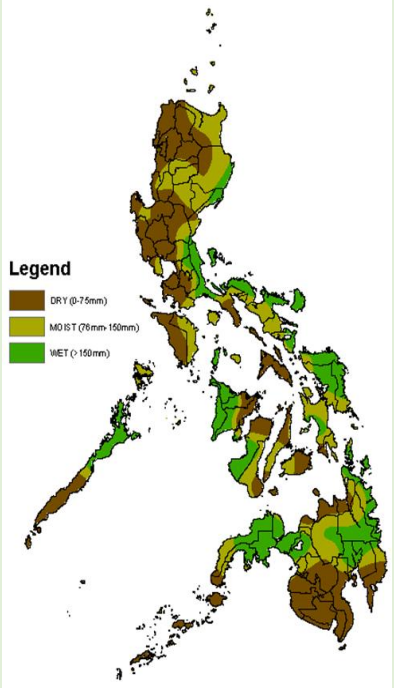

Lunes hanggang Miyerkules (Nobyembre 16–18): Inaasahan sa Batanes at Babuyan Islands ang bahagyang maulap hanggang maulap na kalangitan na may pulu-pulong mahinang pag-ulan dulot ng *Amihan*. Samantala, ang Metro Manila at natitirang bahagi ng kapuluan ay makararanas ng bahagyang maulap hanggang maulap na kalangitan na may posibilidad ng pulu-pulong pag-ulan o pagkidlat at pagkulog, lalo na sa mga silangang bahagi, dulot ng *Easterlies*.

Huwebes (Nobyembre 19): Magdudulot ang *Amihan* ng maulap na kalangitan na may mahinang pag-ulan sa Lambak ng Cagayan, habang bahagyang maulap hanggang maulap na kalangitan na may pulu-pulong mahinang pag-ulan ang mararanasan sa Rehiyon ng Ilocos, CAR, at Gitnang Luzon. Samantala, inaasahan sa Mindanao ang madalas na maulap na kalangitan na may mga kalat-kalat na pag-ulan at pagkidlat at pagkulog dulot ng *Intertropical Convergence Zone (ITCZ)*. Ang Metro Manila at natitirang bahagi ng bansa ay makararanas ng bahagyang maulap hanggang maulap na kalangitan na may posibilidad ng pulu-pulong pag-ulan o pagkidlat at pagkulog, lalo na sa mga silangang bahagi ng Katimugang Luzon at Visayas, dulot ng *Easterlies*.

LUGAR NG PAGTAYA	TEMPERATURA (^{0}C)		RH (%)	PAGKABASA NG DAHON (ORAS)
	Mababang Bukirin	Mataas na Bukirin		
LUZON	23 – 34	14 – 32	45 – 98	4 – 8
VISAYAS	23 – 35	22 – 33	50 – 96	0 – 4
MINDANAO	23 – 35	21 – 33	50 – 98	4 – 8

PAYONG PANGSAKAHAN

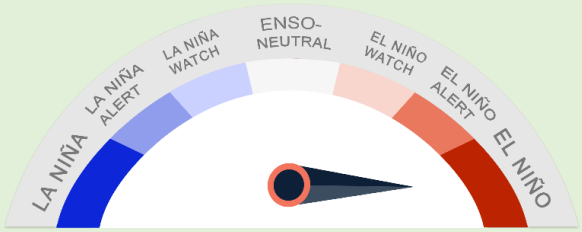

KALAGAYAN NG LUPANG SAKAHAN
(Nobyembre 01 –10, 2026)

Basa – *Casiguran, Itbayat, malaking bahagi ng Quezon, Camarines Norte, Catanduanes, Sorsogon, Leyte, Zamboanga del Norte, Bukidnon, Surigao del Norte, Surigao del Sur, at Lanao del Sur*

Katamtaman – *malaking bahagi ng Lambak ng Cagayan, La Trinidad, Science Garden, Bataan, Rizal, Oriental*

ENSO ALERT SYSTEM STATUS
(mula noong 04 Nobyembre 2026)

EL NIÑO

https://pubfiles.pagasa.dost.gov.ph/pagasaweb/files/climate/monthlyclimateassessment/EN_Advisory_5.pdf

Kasalukuyang umiiral ang napakalakas na El Niño (Very Strong El Niño) sa tropical Pacific. Inaasahang magpapatuloy ito hanggang sa unang kalahati ng taong 2027 at posibleng maabot ang pinakamataas na tindi nito sa pagtatapos ng 2026.

Pinapataas ng El Niño ang posibilidad na makaranas ng kakulangan sa pag-ulan sa ilang bahagi ng bansa, na maaaring magdulot ng mga dry spell at tagtuyot. Gayunpaman, maaari pa ring magkaroon ng mga panahon ng malakas na pag-ulan dahil sa pagdaan ng mga bagyo at iba pang weather systems na nagdadala ng ulan.. Gayunpaman, maaari pa ring magkaroon ng mas mataas sa karaniwang dami ng ulan kapag may pagdaan ng mga tropical cyclone at iba pang weather systems na nagdadala ng ulan. Pinapayuhan ang mga magsasaka na

Mindoro, Hilagang Palawan, Camarines Sur, Albay, Iloilo, Bohol, Northern Samar, Samar, Eastern Samar, Davao del Norte, Davao del Sur, North Cotabato, natitirang bahagi ng *BARMM* **Tuyo** – *Tuguegarao, Mulanay at sa* natitirang bahagi ng bansa	magtipid sa tubig, panatilihing maayos ang irigasyon, at mag-ipon ng tubig-ulan upang matiyak ang suplay ng tubig sa panahon ng El Niño. Gumamit ng mga pananim na matibay sa tagtuyot at mga pamamaraan sa pagpapanatili ng halumigmig ng lupa. Regular na subaybayan ang mga update ng DOST-PAGASA at iangkop ang mga gawaing pansaka ayon sa kondisyon ng panahon. Bagama't mas tuyo ang karaniwang kondisyon, maaari pa ring magkaroon ng localized thunderstorms na may malakas na ulan, hangin, pagkidlat, at posibleng biglaang pagbaha.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

AMIHAN, EASTERLIES, ITCZ, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Linisin at panatilihing maayos ang mga kanal upang maiwasan ang pagbaha at pamamalagi ng tubig sa bukirin.
- Ipagpaliban ang paglalagay ng pataba kung inaasahan ang malakas na pag-ulan upang mabawasan ang pagkawala ng sustansya sa lupa.
- Iwasan ang pag-iisprey ng pestisidyo kapag umuulan o malakas ang hangin upang matiyak ang bisa nito.
- Regular na suriin at panatilihing maayos ang mga sistema ng irigasyon at paagusan ng tubig.
- Alisin ang mga bara at dumi sa mga kanal at daluyan ng tubig upang mapabuti ang daloy ng tubig.
- Mag-ipon at mag-imbak ng tubig-ulan para magamit sa panahon ng tagtuyot.
- Anihin ang mga hinog na pananim bago ang inaasahang matagal o malakas na pag-ulan, kung maaari.
- Laging makinig sa mga payo ng awtoridad at lokal na pamahalaan para sa mga ulat panahon.Maging updated sa DOST-PAGASA website, social media, at PANaHON App.
