**AREAS AFFECTED BY THE WEATHER SYSTEMS**

**TROUGH OF LPA AND THUNDERSTORMS AND MODERATE TO HEAVY RAINS**

- Ensure transport vehicles are in good working condition and equipped with emergency supplies before travel.
- Secure harvested produce, farm inputs, and equipment properly during transport to prevent damage from rain and strong winds.
- Keep fertilizers, pesticides, fuels, and other farm chemicals in secure, elevated, and well-ventilated storage areas away from food, feeds, and water sources.
- Maximize rainfall by using rainwater harvesting systems, such as roof catchments, storage tanks, farm ponds, or small reservoirs.
- Cover rainwater storage tanks and reservoirs to reduce contamination, evaporation, and mosquito breeding.
- Use harvested rainwater efficiently by adopting water-saving irrigation methods, such as drip irrigation or alternate wetting and drying (AWD) for rice.
- Regularly monitor official weather updates and agricultural advisories to guide farming activities and minimize weather-related risks.

| FARM ADVISORY                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|  <p><b>Wet</b> – Zambales, Bataan, Pampanga, Nueva Ecija, Cordillera Administrative Region, Rizal, some portions of Cavite, northern parts of Palawan, Romblon, Occidental Mindoro, most areas of Panay, Negros Occidental, Bukidnon, Davao del Norte and some parts of BARMM</p> <p><b>Moist</b> – Ilocos Norte, Ilocos Sur, Pangasinan, Isabela, Bulacan, Quezon City, Batangas, Tayabas, southern parts of Palawan, Dumangas, Southern Leyte, Eastern Samar, Davao del Sur, and General Santos City</p> <p><b>Dry</b> – Rest of the country</p> |  <p><b>EL NIÑO</b></p> <p><a href="https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf">https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf</a></p> <p>A weak to moderate El Niño is currently present in the tropical Pacific. Climate models indicate that it is likely to intensify and persist through the first half of 2027 (97% probability). There is a 57% probability of El Niño strengthening to a strong event during the July–August–September (JAS) 2026 season, while a very strong El Niño is favored during the October–November–December (OND) 2026 and November–December–January (NDJ) 2026–2027 seasons, with an estimated 81% probability.</p> <p>Farmers are advised to conserve water, maintain irrigation systems, and establish rainwater harvesting facilities to maximize available water during dry periods. The use of drought-tolerant crops and soil moisture conservation practices is encouraged to reduce the impacts of El Niño. Farmers should monitor daily DOST-PAGASA weather updates, as localized thunderstorms may still bring heavy rainfall, strong winds, lightning, and possible flash flooding. Secure farm structures, clear drainage canals, and adjust farm activities based on weather conditions to minimize risks.</p> |

| FISHING ADVISORY                                                                                                                                                                                                                                                                 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| GALE WARNING AND SEA CONDITION                                                                                                                                                                                                                                                   |
| No Gale warning has been raised.                                                                                                                                                                                                                                                 |
| Slight to moderate seas will prevail over the <b>entire archipelago</b> . Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST-PAGASA. |

**SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS**

**TROUGH NG LPA, EASTERLIES, PAGKIDLAT-PAGKULOG AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN**

- Tiyaking nasa maayos na kondisyon ang mga sasakyang gagamitin sa transportasyon at may sapat na kagamitang pang-emergency bago bumiyahe.
- Siguraduhing maayos na nakaseguro ang mga inaning produkto, kagamitang pansakahan, at mga input sa agrikultura habang dinadala upang maiwasan ang pagkasira dulot ng ulan at malalakas na hangin.
- Itago ang mga pataba, pestisidyo, panggatong, at iba pang kemikal sa pagsasaka sa ligtas, mataas, tuyo, at maaliwalas na imbakan na malayo sa pagkain, pakain sa hayop, at mga pinagkukunan ng tubig.
- Sulitin ang pag-aani ng tubig-ulan sa pamamagitan ng paggamit ng mga rainwater harvesting system tulad ng imbakan mula sa bubong, tangke ng tubig, farm ponds, o maliliit na imbakan ng tubig.
- Takpan ang mga tangke at imbakan ng tubig-ulan upang mabawasan ang kontaminasyon, pagsingaw ng tubig, at pamumugaran ng lamok.

- Gamitin nang episyente ang naipong tubig-ulan sa pamamagitan ng mga water-saving irrigation methods, tulad ng drip irrigation o *Alternate Wetting and Drying (AWD)* para sa palayan.
- Regular na subaybayan ang mga opisyal na ulat ng panahon at mga abisong pang-agrikultura upang magabayan ang mga gawain sa bukid at mabawasan ang panganib na dulot ng masamang panahon.

| PAYONG PANGSAKAHAN                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
