EL NIÑO

https://pubfiles.pagasa.dost.gov.ph/pagasaweb/files/climate/monthlyclimateassessment/EN_Advisory_5.pdf

A strong to very strong El Niño is present in the Tropical Pacific. Forecasts predict that El Niño will continue until the first half of 2027 and may reach its peak before the end of 2026.

El Niño increases the likelihood of below-normal rainfall, which may lead to adverse impacts, including dry spells and droughts in some areas of the country. However, above-normal rainfall conditions may still occur during the passage of tropical cyclones and other rain-bearing weather systems. Farmers are advised to conserve water, maintain irrigation systems, and harvest rainwater to ensure adequate water supply during El Niño. Use drought-tolerant crops and soil moisture conservation practices. Regularly monitor DOST-PAGASA weather updates and adjust farm activities accordingly. Despite generally drier conditions, localized thunderstorms may still bring heavy rain, strong winds, lightning, and possible flash flooding.

FISHING ADVISORY

GALE WARNING AND SEA CONDITION

No Gale Warning is raised.

Moderate to rough seas will be experienced over the seaboards of the **Extreme Northern Luzon,** while slight to moderate seas will be experienced over **Visayas and the rest of Luzon.** Slight seas will be experienced over the seaboards of **Mindanao.** Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST- PAGASA.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

ITCZ, NORTHEASTERLY WINDFLOW, EASTERLIES, PAGKIDLAT-PAGKULOG AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Gumamit ng mulch o iba pang pantakip sa lupa upang mabawasan ang pagguho ng lupa at pagkawala ng sustansiya tuwing malakas ang pag-ulan.
- Suriin ang mga naaning produkto para sa sobrang moisture, pagkakabugbog, o kontaminasyon bago itago o ibenta.
- Iskedyul ang paglalagay ng pataba at pestisidyo sa angkop na kondisyon ng panahon at sundin ang mga inirerekomendang paraan ng paggamit.
- Linisin at panatilihing maayos ang mga kanal, bomba, at pasilidad sa imbakan ng tubig para sa maayos na patubig at paggamit ng tubig.
- Aniin sa tamang panahon ang mga hinog na pananim at patuyuin at itago nang maayos upang mapanatili ang kalidad ng ani.
- Regular na bantayan ang mga pananim para sa mga peste, sakit, at mga senyales ng kakulangan sa tubig.
- Laging makinig sa mga payo ng mga awtoridad at lokal na pamahalaan tungkol sa mga kondisyon ng panahon. Manatiling updated sa mga ulat at abiso mula sa DOST-PAGASA website, social media accounts, at PANaHON App.

ENSO ALERT SYSTEM STATUS
(mula noong 07 Oktubre 2026)

EL NIÑO

https://pubfiles.pagasa.dost.gov.ph/pagasaweb/files/climate/monthlyclimateassessment/EN_Advisory_5.pdf

Ang malakas hanggang sa napakalakas na El Niño ay umiiral sa Tropical Pacific. Batay sa mga pagtataya, inaasahang magpapatuloy ang El Niño hanggang sa unang kalahati ng 2027 at maaaring umabot sa pinakamalakas nitong antas bago matapos ang 2026.

Ang El Niño ay nagpapataas ng posibilidad na magkaroon ng mas mababa sa karaniwang dami ng ulan, na maaaring magdulot ng mga negatibong epekto tulad ng dry spell at tagtuyot sa ilang bahagi ng bansa. Gayunpaman, maaari pa ring magkaroon ng mas mataas sa karaniwang dami ng ulan kapag may pagdaan ng mga tropical cyclone at iba pang weather systems na nagdadala ng ulan. Pinapayuhan ang mga magsasaka na magtipid sa tubig, panatilihing maayos ang irigasyon, at mag-ipon ng tubig-ulan upang matiyak ang suplay ng tubig sa panahon ng El Niño. Gumamit ng mga pananim na matibay sa tagtuyot at mga pamamaraan sa pagpapanatili ng halumigmig ng lupa. Regular na subaybayan ang mga update ng DOST-PAGASA at iangkop ang mga gawaing pansaka ayon sa kondisyon ng panahon. Bagama't mas tuyo ang karaniwang kondisyon, maaari pa ring magkaroon ng localized thunderstorms na may malakas na ulan, hangin, pagkidlat, at posibleng biglaang pagbaha.

PAYO SA MGA MANGINGISDA

GALE WARNING AT KONDISYON NG KARAGATAN

Walang nakataas na Gale Warning.
