EL NIÑO

<https://pagasa.dost.gov.ph/climate/climate-advisories#>

El Niño is expected to develop by mid-2026, increasing the possibility of below-normal rainfall, dry spells, and drought. Farmers are advised to maintain irrigation systems, use drought-tolerant crops, and harvest mature crops early when needed. Localized thunderstorms may still occur, especially in the afternoon or evening, bringing heavy rain, strong winds, lightning, and possible flash flooding in low-lying areas. Farmers should stay alert to daily weather updates, secure farm structures, and avoid field activities during thunderstorms, and adjust planting schedules based on DOST-PAGASA forecasts.

AREAS AFFECTED BY THE WEATHER SYSTEMS

LPA, SOUTHWEST MONSOON, ITCZ, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Clear and maintain canals, dikes, drainage channels, and waterways to facilitate the rapid removal of excess water from farms.
- Store water in ponds, tanks, drums, or other storage facilities for future use during possible dry periods or interruptions in water supply.
- Strengthen plant supports such as stakes, trellises, and protective structures to minimize crop damage from strong winds and heavy rains.
- Harvest mature crops promptly when weather conditions are favorable and ensure proper sorting, packaging, and storage to maintain quality.
- Schedule the delivery and transport of fresh produce during periods of safer weather and use covered vehicles to protect products from rain and moisture.
- Stay updated with weather forecasts and advisories from DOST-PAGASA and local authorities to support timely agricultural operations and risk management.
