

WEEKEND/SPECIAL FARM WEATHER OUTLOOK

WSFWO: NO. 26 – 222

Issued: 4:00 PM, Friday, 25 September 2026

Valid until: 7:00 AM, Monday, 28 September 2026

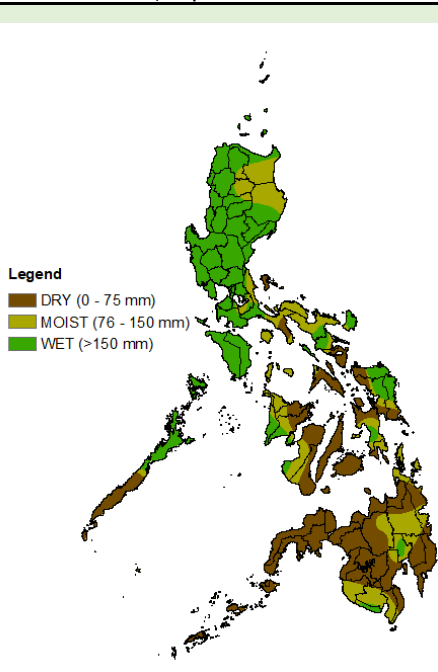

TODAY UNTIL TOMORROW (SEPTEMBER 25-26): Intertropical Convergence Zone (ITCZ) is causing cloudy skies with scattered rains and thunderstorms over Zamboanga Peninsula, Northern Mindanao, Caraga, and Davao Oriental. Metro Manila and the rest of the country will be partly cloudy to cloudy with isolated rainshowers or thunderstorms. Meanwhile, Tropical Cyclone (TC) Queenie east of Extreme Northern Luzon is moving generally west northwestward and is less likely to cause direct effect over any part of the landmass. However, rains with gusty winds may be experienced over some parts of Extreme Northern Luzon by tomorrow if the diameter of TC Queenie expands further during its closest approach in the country before heading northeastward.

SUNDAY UNTIL MONDAY (SEPTEMBER 27-28): ITCZ will still cause cloudy skies with scattered rains and thunderstorms over most of Visayas and over Caraga, Northern Mindanao, Zamboanga Peninsula, and Palawan. The rest of the country will have partly cloudy to cloudy skies with isolated rainshowers or thunderstorms. By this period, Queenie may already be outside PAR.

FORECAST AREA	TEMPERATURE		RH (%)	LEAF WETNESS (HRS)
	LOWLAND	UPLAND		
LUZON	23 – 35	16 – 34	50 – 98	4 – 8
VISAYAS	23 – 35	21 – 34	55 – 98	4 – 8
MINDANAO	23 – 34	21 – 33	60 – 98	4 – 8

FARM ADVISORY

SOIL MOISTURE CONDITION (September 11 – 20, 2026)

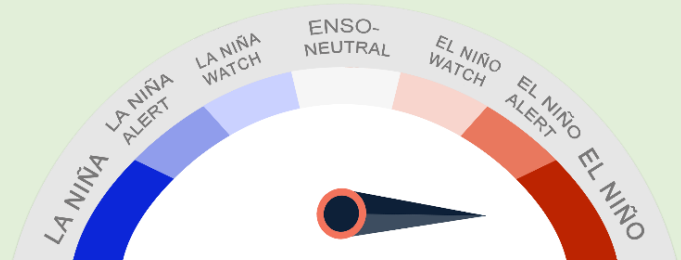

Marinduque, Catanduanes, Sorsogon, Iloilo, and some parts of Leyte

Moist – Some parts of Cagayan, southern portion of Quezon, Laguna, Romblon, Camarines Norte, Camarines Sur, Negros Occidental, Samar, Eastern

Wet – Ilocos Region, most of Cagayan Valley, Cordillera Administrative Region, Central Luzon, National Capital Region, Cavite, Batangas, Rizal, northern portion of Quezon, most parts of Palawan, Mindoro provinces,

ENSO ALERT SYSTEM STATUS (Updated as of 07 September 2026)

EL NIÑO

<https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf>

Moderate to strong El Niño is present in the Tropical Pacific. Climate models predict that El Niño will continue until the first half of 2027 and may reach a very strong state before the end of 2026.

Farmers are advised to conserve water, maintain irrigation systems, and establish rainwater harvesting facilities to maximize available water during dry periods. The use of drought-tolerant crops and soil moisture conservation practices is encouraged to reduce the impacts of El Niño. Farmers should monitor daily DOST-PAGASA weather updates, as localized thunderstorms may still bring heavy rainfall, strong winds, lightning, and possible flash flooding. Secure farm structures, clear drainage canals, and adjust

Samar, Bukidnon, Davao del Norte, South Cotabato,
and Surigao del Norte

Dry – Rest of the country

farm activities based on weather conditions to minimize risks.

AREAS AFFECTED BY THE WEATHER SYSTEMS

ITCZ, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Clean and maintain drainage canals to prevent waterlogging and flooding.
- Delay fertilizer application when heavy rainfall is forecast to minimize nutrient loss.
- Avoid pesticide spraying during rainy or windy conditions to ensure effectiveness.
- Regularly inspect and maintain irrigation and drainage systems.
- Remove debris from canals and waterways to improve water flow.
- Harvest and store excess rainwater for future use during dry periods.
- Harvest mature crops before prolonged or heavy rainfall, when feasible.
- Continue monitoring weather forecasts, rainfall advisories, and other relevant information from DOST-PAGASA and local authorities for timely decision-making.

TAYA NG PANAHOON AT MGA PAYONG PANSAKAHAN

FWFA: NO. 26 – 222

Inilabas ng: 4:00 PM, Biyernes, 25 Setyembre 2026

May bisa hanggang: 7:00 AM, Lunes, 28 Setyembre 2026

NGAYONG ARAW HANGGANG BUKAS (SETYEMBRE 25-26): Magkakaroon ng maulap na kalangitan na may kalat-kalat na pag-ulan at pagkidlat-pagkulong sa Zamboanga Peninsula, Hilagang Mindanao, Caraga, at Davao Oriental dahil sa Intertropical Convergence Zone (ITCZ). Ang Metro Manila at natitirang bahagi ng bansa ay magkakaroon ng bahagyang maulap hanggang sa maulap na kalangitan na may pulu-pulong pag-ulan o pagkidlat-pagkulong. Samantala, ang Bagyong Queenie na nasa silangan ng Dulong Hilagang Luzon ay kumikilos pa-kanluran hilagang kanluran at maliit ang posibilidad na direktang makakaapekto sa alinmang bahagi ng kalupaan. Gayunpaman, posible pa din na maranasan bukas ng pag-ulan na may pagbugso ng hangin sa ilang bahagi ng Dulong Hilagang Luzon kung mas lalawak pa ang sakop ng Bagyong Queenie habang nasa pinakamalapit na posisyon ito sa bansa bago tumungo sa hilagang silangan.

LINGGO HANGGANG SA LUNES (SETYEMBRE 25-26): Magdadala pa din ang ITCZ ng maulap na kalangitan na may kalat-kalat na pag-ulan at pagkidlat-pagkulong sa malaking bahagi ng Kabisayaan at sa Caraga, Hilagang Mindanao, Zamboanga Peninsula, at Palawan. Ang natitirang bahagi ng bansa ay magkakaroon ng bahagyang maulap hanggang sa maulap na kalangitan na may pulu-pulong pag-ulan o pagkidlat-pagkulong. Sa panahong ito, maaaring nasa labas na ng PAR ang Bagyong Queenie.

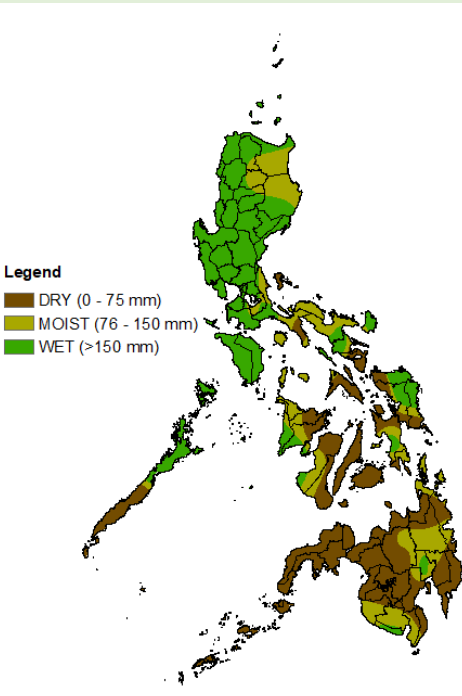

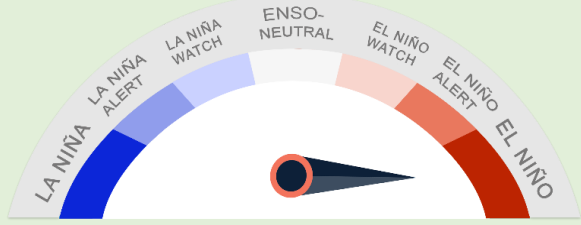

LUGAR NG PAGTAYA	TEMPERATURA (°C)		RH (%)	PAGKABASA NG DAHON (ORAS)
	Mababang Bukirin	Mataas na Bukirin		
LUZON	23 – 35	16 – 34	50 – 98	4 – 8
VISAYAS	23 – 35	21 – 34	55 – 98	4 – 8
MINDANAO	23 – 34	21 – 33	60 – 98	4 – 8

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

ITCZ, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Linisin at panatiliing maayos ang mga kanal upang maiwasan ang pagbaha at pamamalagi ng tubig sa bukirin.
- Ipagpaliban ang paglalagay ng pataba kung inaasahan ang malakas na pag-ulan upang mabawasan ang pagkawala ng sustansya sa lupa.
- Iwasan ang pag-iisprey ng pestisidyo kapag umuulan o malakas ang hangin upang matiyak ang bisa nito.
- Regular na suriin at panatiliing maayos ang mga sistema ng irigasyon at paagusan ng tubig.
- Alisin ang mga bara at dumi sa mga kanal at daluyan ng tubig upang mapabuti ang daloy ng tubig.
- Mag-ipon at mag-imbak ng tubig-ulan para magamit sa panahon ng tagtuyot.
- Anihin ang mga hinog na pananim bago ang inaasahang matagal o malakas na pag-ulan, kung maaari.
- Laging makinig sa mga payo ng awtoridad at lokal na pamahalaan para sa mga ulat panahon. Maging updated sa DOST-PAGASA website, social media, at PANaHON App.

PAYONG PANGSAKAHAN	
KALAGAYAN NG LUPANG SAKAHAN (Setyembre 11 – 20, 2026)	ENSO ALERT SYSTEM STATUS (mula noong 07 Setyembre 2026)
 Legend - DRY (0 - 75 mm) - MOIST (76 - 150 mm) - WET (>150 mm) Iloilo, at ilang bahagi ng Leyte Katamtaman – Ilang bahagi ng Cagayan, katimugang bahagi ng Quezon, Laguna, Romblon, Camarines Norte, Camarines Sur, Negros Occidental, Samar, Eastern Samar, Bukidnon, Davao del Norte, South Cotabato, at Surigao del Norte Tuyo – Natitirang bahagi bahagi	 EL NIÑO https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf Kasalukuyang umiiral ang katamtamang hanggang s amalakas na El Niño sa Tropical Pacific. Ayon sa mga climate model, inaasahang magpapatuloy ang El Niño hanggang sa unang kalahati ng 2027 at may posibilidad na maging mas malakas bago matapos ang 2026. Pinapayuhan ang mga magsasaka na magtipid sa tubig, panatilihin ang irigasyon, maghanda ng imbakan ng tubig-ulan, at gumamit ng mga barayting matibay sa tagtuyot. Subaybayan ang mga ulat ng DOST-PAGASA dahil maaari pa ring magkaroon ng mga pagkulog at pagkidlat na may kasamang malakas na ulan, bugso ng hangin, at posibleng pagbaha. Panatilihing ligtas ang mga pasilidad sa bukid at iangkop ang mga gawaing pangsakahan batay sa lagay ng panahon.
