

FARM WEATHER FORECAST AND ADVISORIES
FWFA: NO. 26 – 161

Issued: 7:00 AM, Thursday, 16 July 2026

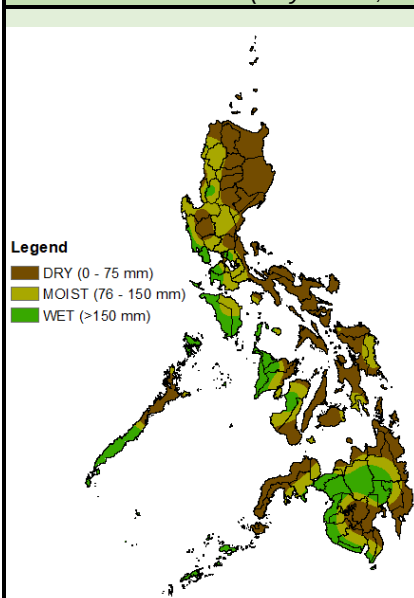

Valid until: 7:00 AM, Friday, 17 July 2026

SYNOPSIS: Southwest Monsoon affecting Extreme Northern Luzon.

FORECAST AREA	AGRI-WEATHER	WINDS	TEMPERATURE (0C)		RH%	LEAF WETNESS (HRS)
			LOWLAND	UPLAND		
Batanes and Babuyan Islands	Partly cloudy to cloudy skies with isolated rainshowers or thunderstorms	Light to moderate from south to southeast	26 – 32	23 – 31	60 – 98	0 – 6
Metro Manila and the rest of the country	Partly cloudy to cloudy skies with isolated rainshowers or thunderstorms	Light to moderate from south to southeast	23 – 37	17 – 32	50 – 96	0 – 4

FARM ADVISORY

SOIL MOISTURE CONDITION
(July 1 – 10, 2026)

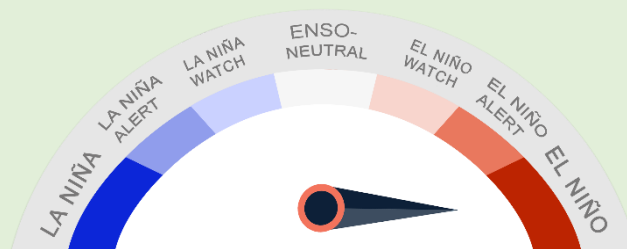

Wet – Zambales, Bataan, most parts of Cordillera Administrative Region, some portions of National Capital Region, most parts of Palawan, Romblon, Occidental Mindoro, Marinduque, some portions of Capiz, Negros Occidental, and BARMM

Moist – Ilocos Sur, La Union, Pangasinan, Nueva Ecija, Batangas, Rizal, Laguna, some portions of Cavite, Oriental Mindoro, some portions of Iloilo, Siquijor, Southern Leyte, some portions of Eastern Samar, and Davao del Sur

Dry – Rest of the country

ENSO ALERT SYSTEM STATUS
(Updated as of 06 July 2026)

EL NIÑO

<https://www.pagasa.dost.gov.ph/climate/el-nino-la-nina/monitoring>

A weak to moderate El Niño continues to persist in the tropical Pacific. Climate models suggest that it will continue to intensify, becoming very strong by the October–November–December 2026 season. Farmers are advised to maintain irrigation systems, use drought-tolerant crops, and harvest mature crops early when needed. Localized thunderstorms may still occur, especially in the afternoon or evening, bringing heavy rain, strong winds, lightning, and possible flash flooding in low-lying areas. Farmers should stay alert to daily weather updates, secure farm structures, and avoid field activities during thunderstorms, and adjust planting schedules based on DOST-PAGASA forecasts.

AREAS AFFECTED BY THE WEATHER SYSTEMS

SOUTHWEST MONSOON, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Clear canals, ditches, and drainage channels to prevent waterlogging and flooding.
- Reinforce dikes, embankments, and pond walls to minimize erosion and structural damage.
- Implement soil conservation practices, such as mulching or contour barriers, to reduce erosion during heavy rainfall.
- Collect and store rainwater for future irrigation once weather conditions improve.
- Secure farm machinery, tools, fertilizers, chemicals, and harvested produce in safe, elevated storage areas.
- Keep farm records of weather impacts, crop losses, and management actions to improve future preparedness.
- Assess field conditions before allowing workers to return, ensuring the area is free from hazards such as unstable trees, damaged electrical lines, or deep floodwaters.

- Follow official advisories from DOST-PAGASA, the Department of Agriculture, and local government units.

FISHING ADVISORY

GALE WARNING AND SEA CONDITION

No Gale warning was raised

Moderate seas will prevail over over **the whole archipelago**. Still be reminded to be very careful in fishing, especially those using small seacraft. Always bring an emergency kit. Be updated for the latest weather updates and farm advisories from DOST-PAGASA.

ADDITIONAL INFORMATION

DAILY EXTREMES		MONTHLY EXTREMES	
Maximum Temperature	38.9 °C (Tuguegarao City, 1960)	Maximum Temperature	41.0 °C (Tuguegarao, 1915)
Minimum Temperature	14.0 °C (Baguio City, 1910)	Minimum Temperature	12.2 °C (Baguio City, 1907)
Rainfall	425.2 mm (Laoag City, 2008)	Rainfall	1,085.8 mm (Baguio City, 2001)

TAYA NG PANAHON AT MGA PAYONG PANSAKAHAN
FWFA: NO. 26 – 161

Inilabas ng: 7:00 AM Huwebes, 16 Hulyo 2026

May bisa hanggang: 7:00 AM Biyernes, 17 Hulyo 2026

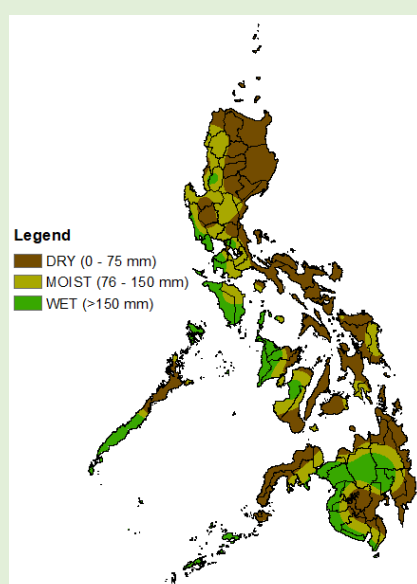

SYNOPSIS: Habagat ang nakakaapekto sa dulong Hilagang Luzon.

LUGAR NG PAGTAYA	LAGAY NG PANAHON PANG-AGRIKULTURA	HANGIN	TEMPERATURA (°C)		RH%	PAGKABASA NG DAHON (ORAS)
			Mababang Bukirin	Mataas na Bukirin		
Batanes at mga Isla ng Babuyan	Bahagyang maulap hanggang sa maulap na kalangitan na may pulu-pulong pag-ulan o pagkidlat-pagkulong	Mahina hanggang sa katamtaman mula timog hanggang timog-kanluran	26 – 32	23 – 31	60 – 98	0 – 6
Metro Manila at natitirang bahagi ng bansa	Bahagyang maulap hanggang sa maulap na kalangitan na may pulu-pulong pag-ulan o pagkidlat-pagkulong	Mahina hanggang sa katamtaman mula timog hanggang timog-kanluran	23 – 37	17 – 32	50 – 96	0 – 4

PAYONG PANGSAKAHAN

KALAGAYAN NG LUPANG SAKAHAN
(Hulyo 1 – 10, 2026)

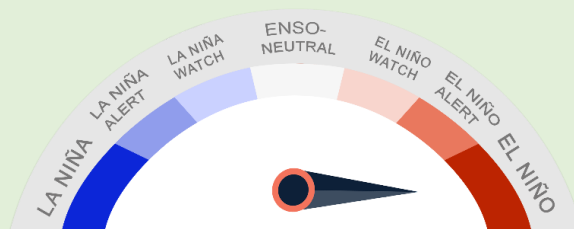

ENSO ALERT SYSTEM STATUS
(mula noong 06 Hulyo 2026)

Basa – Zambales, Bataan, malaking bahagi ng Cordillera Administrative Region, ilang bahagi ng National Capital Region, malaking bahagi ng Palawan, Romblon, Occidental Mindoro, Marinduque, ilang bahagi ng Capiz, Negros Occidental, at BARMM

Katamtaman – Ilocos Sur, La Union, Pangasinan, Nueva Ecija, Batangas, Rizal, Laguna, ilang bahagi ng Cavite, Oriental

Mindoro, ilang bahagi ng Iloilo, Siquijor, Southern Leyte, ilang bahagi ng Eastern Samar, at Davao del Sur
Tuyo – Natitirang bahagi bahagi

EL NIÑO

<https://www.pagasa.dost.gov.ph/climate/el-nino-la-nina/monitoring>
Patuloy na umiiral ang mahina hanggang sa katamtamang El Niño sa tropikal na Karagatang Pasipiko. Ayon sa mga climate model, inaasahang patuloy pa itong lalakas at magiging napakalakas sa panahon ng Oktubre–Nobyembre–Disyembre 2026. Pinapayuhan ang mga magsasaka na panatilihin ang maayos na irigasyon, gumamit ng drought-tolerant na pananim, at anihin agad ang mga hinog na tanim kung kinakailangan. Maaari pa ring magkaroon ng localized thunderstorms, lalo na sa hapon o gabi, na may kasamang malakas na ulan, hangin, kidlat, at posibleng flash flood sa mabababang lugar. Panatiling updated sa araw-araw na lagay ng panahon, tiyakin ang kaligtasan ng mga pasilidad sa bukid, iwasan ang trabaho sa bukid tuwing may thunderstorm, at iangkop ang taniman ayon sa forecast ng DOST-PAGASA.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

HABAGAT, PAGKIDLAT-PAGKULOG AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Linisin ang mga kanal, estero, at daluyan ng tubig upang maiwasan ang pagbabara, pagbaha, at pananatili ng tubig sa sakahan.
- Patibayin ang mga pilapil, dike, at pader ng palaisdaan upang mabawasan ang pagguho ng lupa at pagkasira ng mga estruktura.
- Gumamit ng mga pamamaraang pangangalaga sa lupa, tulad ng pagmumulch at paggawa ng contour barriers, upang mabawasan ang pagguho ng lupa dulot ng malalakas na pag-ulan.

- Mag-ipon at mag-imbak ng tubig-ulan para magamit sa irigasyon kapag bumuti na ang kondisyon ng panahon.
- Ilagay sa ligtas at mataas na lugar ang mga makinarya, kagamitan, pataba, kemikal, at mga inaning ani upang maiwasan ang pagkasira dulot ng pagbaha.
- Panatilihin ang talaan ng mga epekto ng panahon, pinsala sa pananim, at mga isinagawang hakbang sa pamamahala upang mapabuti ang paghahanda sa mga susunod na kalamidad.
- Suriing mabuti ang kondisyon ng sakahan bago pahintulatang makabalik ang mga manggagawa, at tiyaking wala nang panganib tulad ng mga punong maaaring bumagsak, naputol na linya ng kuryente, o malalim na baha.
- Sundin ang mga opisyal na babala at abiso mula sa DOST-PAGASA, Department of Agriculture (DA), at mga lokal na pamahalaan (LGUs) upang makagawa ng angkop na hakbang para sa kaligtasan at pamamahala ng sakahan.

PAYO SA MGA MANGINGISDA

GALE WARNING AT KONDISYON NG KARAGATAN

Walang nakataas na Gale Warning

Katamtamang pag-alon ng karagatan ang iiral sa **buong kapuluan**. Ang mga mangingisda aypinapaalalahanan na palaging mag-ingat, ugaliing magdala ng mga gamit pangkagipitan, magbantay at makinig sa mga paalala at patalastas mula sa DOST-PAGASA.

DAGDAG KAALAMAN

DAILY EXTREMES		MONTHLY EXTREMES	
Pinakamataas na Temperatura	38.9 °C (Tuguegarao City, 1960)	Pinakamataas na Temperatura	41.0 °C (Tuguegarao, 1915)
Pinakamababang Temperatura	14.0 °C (Baguio City, 1910)	Pinakamababang Temperatura	12.2 °C (Baguio City, 1907)
