EL NIÑO

<https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outline.pdf>

A weak to moderate El Niño is currently present in the tropical Pacific. Climate models indicate that it is likely to intensify and persist through the first half of 2027 (97% probability). There is a 57% probability of El Niño strengthening to a strong event during the July–August–September (JAS) 2026 season, while a very strong El Niño is favored during the October–November–December (OND) 2026 and November–December–January (NDJ) 2026–2027 seasons, with an estimated 81% probability.

Farmers are advised to conserve water, maintain irrigation systems, and establish rainwater harvesting facilities to maximize available water during dry periods. The use of drought-tolerant crops and soil moisture conservation practices is encouraged to reduce the impacts of El Niño. Farmers should monitor daily DOST-PAGASA weather updates, as localized thunderstorms may still bring heavy rainfall, strong winds, lightning, and possible flash flooding. Secure farm structures, clear drainage canals, and adjust farm activities based on weather conditions to minimize risks.

- Iwasan ang pag-iisprey ng pestisidyo kapag umuulan o malakas ang hangin upang matiyak ang bisa nito.
- Maglagay ng tukod o suporta sa matatangkad at gumagapang na pananim upang maiwasan ang pagkakatumba dulot ng malakas na hangin at ulan.
- Regular na suriin at panatilihin maayos ang mga sistema ng irigasyon at paagusan ng tubig.
- Alisin ang mga bara at dumi sa mga kanal at daluyan ng tubig upang mapabuti ang daloy ng tubig.
- Mag-ipon at mag-imbak ng tubig-ulan para magamit sa panahon ng tagtuyot.
- Anihin ang mga hinog na pananim bago ang inaasahang matagal o malakas na pag-ulan, kung maaari.
- Manatiling updated sa mga opisyal na taya ng panahon at mga payo sa pagsasaka mula sa DOST-PAGASA, Department of Agriculture (DA), at mga lokal na pamahalaan (LGUs).

ENSO ALERT SYSTEM STATUS (mula noong 22 Hulyo 2026)

EL NIÑO

<https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf>

Kasalukuyang umiiral ang mahina hanggang katamtamang El Niño sa tropical Pacific. Inaasahang lalakas ito at magpapatuloy hanggang unang kalahati ng 2027 (97% posibilidad). May 57% posibilidad na maging strong El Niño sa Hulyo–Agosto–Setyembre (JAS) 2026 at 81% posibilidad na maging very strong El Niño sa Oktubre–Nobyembre–Disyembre (OND) 2026 at Nobyembre–Disyembre–Enero (NDJ) 2026–2027.

Pinapayuhan ang mga magsasaka na magtipid sa tubig, panatilihin ang irigasyon, maghanda ng imbakan ng tubig-ulan, at gumamit ng mga barayting matibay sa tagtuyot. Subaybayan ang mga ulat ng DOST-PAGASA dahil maaari pa ring magkaroon ng mga pagkulong at pagkidlat na may kasamang malakas na ulan, bugso ng hangin, at posibleng pagbaha. Panatilihin ang mga pasilidad sa bukid at iangkop ang mga gawaing pangsakahan batay sa lagay ng panahon.
