ENSO ALERT SYSTEM STATUS (Updated as of 07 September 2026)

EL NIÑO

<https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf>

Moderate to strong El Niño is present in the Tropical Pacific. Climate models predict that El Niño will continue until the first half of 2027 and may reach a very strong state before the end of 2026.

Farmers are advised to conserve water, maintain irrigation systems, and establish rainwater harvesting facilities to maximize available water during dry periods. The use of drought-tolerant crops and soil moisture conservation practices is encouraged to reduce the impacts of El Niño. Farmers should monitor daily DOST-PAGASA weather updates, as localized thunderstorms may still bring heavy rainfall, strong winds, lightning, and possible flash flooding. Secure farm structures, clear drainage canals, and adjust farm activities based on weather conditions to minimize risks.

AREAS AFFECTED BY THE WEATHER SYSTEMS

SOUTHWEST MONSOON, TROUGH OF LPA, THUNDERSTORMS AND MODERATE TO HEAVY RAINS

- Clean and maintain drainage canals to prevent waterlogging and flooding.
- Delay fertilizer application when heavy rainfall is forecast to minimize nutrient loss.
- Avoid pesticide spraying during rainy or windy conditions to ensure effectiveness.
- Regularly inspect and maintain irrigation and drainage systems.
- Remove debris from canals and waterways to improve water flow.
- Harvest and store excess rainwater for future use during dry periods.
- Harvest mature crops before prolonged or heavy rainfall, when feasible.
- Continue monitoring weather forecasts, rainfall advisories, and other relevant information from DOST-PAGASA and local authorities for timely decision-making.

PAYONG PANGSAKAHAN

KALAGAYAN NG LUPANG SAKAHAN
(Setyembre 1 – 10, 2026)

ENSO ALERT SYSTEM STATUS
(mula noong 07 Setyembre 2026)

EL NIÑO

<https://pubfiles.pagasa.dost.gov.ph/climps/climateforum/outlook.pdf>

Kasalukuyang umiiral ang katamtamang hanggang s amalakas na El Niño sa Tropical Pacific. Ayon sa mga climate model, inaasahang magpapatuloy ang El Niño hanggang sa unang kalahati ng 2027 at may posibilidad na maging mas malakas bago matapos ang 2026.

Pinapayuhan ang mga magsasaka na magtipid sa tubig, panatilihin ang irigasyon, maghanda ng imbakan ng tubig-ulan, at gumamit ng mga barayting matibay sa tagtuyot. Subaybayan ang mga ulat ng DOST-PAGASA dahil maaari pa ring magkaroon ng mga pagkulong at pagkidlat na may kasamang malakas na ulan, bugso ng hangin, at posibleng pagbaha. Panatilihin ang mga pasilidad sa bukid at iangkop ang mga gawaing pangsakahan batay sa lagay ng panahon.

SA MGA LUGAR NA APEKTADO NG WEATHER SYSTEMS

HABAGAT, TROUGH NG LPA, PAGKIDLAT-PAGKULOG, AT KATAMTAMAN HANGGANG MALAKAS NA PAG-ULAN

- Linisin at panatilihin maayos ang mga kanal upang maiwasan ang pagbaha at pamamalagi ng tubig sa bukirin.
- Ipagpaliban ang paglalagay ng pataba kung inaasahan ang malakas na pag-ulan upang mabawasan ang pagkawala ng sustansya sa lupa.
- Iwasan ang pag-iisprey ng pestisidyo kapag umuulan o malakas ang hangin upang matiyak ang bisa nito.
- Regular na suriin at panatilihin maayos ang mga sistema ng irigasyon at paagusan ng tubig.
- Alisin ang mga bara at dumi sa mga kanal at daluyan ng tubig upang mapabuti ang daloy ng tubig.
- Mag-ipon at mag-imbak ng tubig-ulan para magamit sa panahon ng tagtuyot.
- Anihin ang mga hinog na pananim bago ang inaasahang matagal o malakas na pag-ulan, kung maaari.
- Laging makinig sa mga payo ng awtoridad at lokal na pamahalaan para sa mga ulat panahon. Maging updated sa DOST-PAGASA website, social media, at PANaHON App.
